Proceedings of the 36th International MATADOR Conference Srichand Hinduja,Lin Li,2010-08-05 Presented here are 130 refereed papers given at the 36th MATADOR Conference held at The University of Manchester in July 2010 The MATADOR series of conferences covers the topics of Manufacturing Automation and Systems Technology Applications Design Organisation and Management and Research The proceedings of this Conference contain original papers contributed by researchers from many countries on different continents The papers cover the principles techniques and applications in aerospace automotive biomedical energy consumable goods and process industries The papers in this volume reflect the importance of manufacturing to international wealth creation the emerging fields of micro and nano manufacture the increasing trend towards the fabrication of parts using lasers the growing demand for precision engineering and part inspection techniques and the changing trends in manufacturing within a global environment

Review of Progress in Quantitative Nondestructive Evaluation Donald O. Thompson,Dale E. Chimenti,2012-12-06 The objective of this study was to increase the understanding of damage in composite materials with through the thickness reinforcements As a first step it was necessary to develop new ultrasonic imaging technology to better assess internal damage of the composite A useful ultrasonic imaging technique has been successfully developed to assess the internal damage of composite panels The ultrasonic technique accurately determines the size of the internal damage It was found that the ultrasonic imaging technique was better able to assess the damage in a composite panel with through the thickness reinforcements than by destructively sectioning the specimen and visual inspection under a microscope Microscopic determination of crack location

and lengths in a composite panel with through the thickness reinforcements was almost impossible Five composite compression after impact panels were tested The compression after impact strength of the panels with the through the thickness reinforcements was almost twice that of the comparable panel without through the thickness reinforcement
