Lidia Gonzalez,2023-02-03 Math really is for everyone so let s prove it You ve heard it from kids from friends and from celebrities I m bad at math It s a line that society tends to accept without examination after all some people just aren t math people right Wrong As we do with other essential skills we need to expose the stereotypes challenge the negative mindsets and finally confront the systemic opportunity gaps in math education and replace them with a new vision for what math is who it s for and who can excel at it In this book you ll find Research on teacher and student mindsets and their effect on student achievement Audience specific and differentiated tools reflection questions and suggested actions for educators at all levels of the system Examples from popular media as well as personal stories and anecdotes Quotes data driven figures and suggestions for deeper learning on all aspects of a positive and equitable vision of math education Both social commentary and a toolkit of solutions this bold new book directly challenges the constructs that have historically dictated our perceptions of what makes someone a math person Only by dismantling those misplaced assumptions can we reform math education so it works for everyone Because in truth we are all math people
