Politique et Société en Sicile, XIIe-XVe Siècles Henri Bresc, 2024-10-28 In the 12th century under its Norman rulers Sicily stood as one of the most flourishing regions of the Mediterranean. By the late 15th century it had sunk into the state of semi colonial depression and dependence that has characterized so much of its modern history. It is this transformation a process of socio economic change that went hand in hand with political turmoil that forms the subject of this volume. Henri Bresc approaches this both from the viewpoint of particular topics such as the notarial class or the tiny island of Pantelleria and that of larger themes. One of these is the composition of Sicily's population. These articles trace the deteriorating status of the Arabs and Greeks on the island the demographic circumstances that brought in new immigrants notably Albanians but also corsairs and the emergence of a society now dominated by its Latin and Italian components. Other articles contrast the intensive suburban agriculture with the empty spaces of the large estates and throw light on the development of a new landowning structure based on these estates which were given over to cereals grown for export in order to meet the financial demands of the long conflict with the Angevins. Au 12e siècle sous le règne de rois normands la Sicile était une des régions les plus prospères de la Méditerranée. À la fin du 15e siècle elle avait sombré dans l'état de dépendance semi coloniale qui est devenu la marque d'une grande partie de son histoire moderne. Cette transformation un processus de changement socio économique accompagne de bouleversements politiques forme le sujet de cet ouvrage. L'approche d'Henri Bresc se fait deux niveaux selon l'angle de

sujets spécifiques tels la classe notariale ou encore la minuscule le de Pantelleria et partir de thèmes plus vastes parmi ces derniers se trouve la composition de la population sicilienne Ces articles retracent la détérioration du *Assemblée*

Dynamical and Geometric Aspects of Hamilton-Jacobi and Linearized Monge-Ampère Equations Hiroyoshi Mitake,Hung V. Tran,Nam Q. Le,2017-06-14 Consisting of two parts the first part of this volume is an essentially self contained exposition of the geometric aspects of local and global regularity theory for the Monge Amp re and linearized Monge Amp re equations As an application we solve the second boundary value problem of the prescribed affine mean curvature equation which can be viewed as a coupling of the latter two equations Of interest in its own right the linearized Monge Amp re equation also has deep connections and applications in analysis fluid mechanics and geometry including the semi geostrophic equations in atmospheric flows the affine maximal surface equation in affine geometry and the problem of finding Kahler metrics of constant scalar curvature in complex geometry Among other topics the second part provides a thorough exposition of the large time behavior and discounted approximation of Hamilton Jacobi equations which have received much attention in the last two decades and a new approach to the subject the nonlinear adjoint method is introduced The appendix offers a short introduction to the theory of viscosity solutions of first order Hamilton Jacobi equations **Service Contracts** Maurits Barendrecht,Chris Jansen,Marco Loos,Andrea Pinna,Rui Cascao,Stephanie van Gulijk,2009-04-27 The rules presented in this volume of Principles of European Law deal with service contracts The economic importance of service contracts within the European Union is enormous The European Commission recently estimated that

services account for some 50% of EU GDP and for some 60% of employment in the Union though an exact figure is hard to determine given that many services are provided by manufacturers of goods According to the European Commission many services appear in official statistics as manufacturing activity meaning that the role of services in the economy is often significantly underestimated
