Perry, Amy Phillips, 2002 The I Series Applications textbooks strongly emphasize that students learn and master applications skills by being actively engaged by doing These texts have been written with clear error free and unambiguous steps to accomplish tasks that lead to a finished document worksheet or database table The authors made the decision that teaching how to accomplish some task is not enough for complete understanding and mastery Prior to introducing steps the authors discuss why the steps students are about to experience are important and what role the steps play in the overall plan for creating a document workbook or database

F&S Index United States Annual, 1999 *Broadcasting & Cable*, 2002-10 *Encyclopedia of Information Systems: S-Z, Index*, 2003 Cyberspace Lawyer, 1997 *Radio Journalism* Guy Starkey, Andrew Crisell, 2009-01-13 This is not another turgid guide to digital editing writing for radio and the structure of a newsroom team It is an ambitious and accessible study that combines a succinct narrative history of radio journalism with an analysis of its power in the public sphere It describes the development of British audio broadcasting before locating it in an international context and contemplating the contours of the convergent future Such ambition is often the prelude to failure Instead Starkey and Crisell have written a precious introduction to the theory practice and purposes of radio journalism that will be very useful to serious students of the subject This is a very good book THE Times Higher Education Radio Journalism introduces key themes in journalism studies to explore what makes radio reporting distinctive and lay out the claims for radio s critical importance in the news landscape

With their extensive experience in radio production and academia authors Guy Starkey and Andrew Crisell take readers on a tour through the past present and future of radio broadcasting from the infancy of the BBC in the 1920s up to the prospect of rolling news delivered to mobile telephones Grounding each chapter in a survey of scholarly writing on the radio they explore the connections between politics policy and practice inviting critical reflection on who radio professionals are what they do and why Putting theory and practice into dialogue this book is the perfect bridge between unreflective production manuals and generalised media theory texts Witty and engaging Radio Journalism provides an essential framework for understanding the continuing relevance of radio journalism as a profession set of practices and arena for critical debate
