Enlightenment Lincoln Stoller,2024-11-01 This book is not offering enlightenment it s describing it The enlightened mind unites intellect and emotion despite their separation being built into the structure of our brains This split appears in the mythic division between our lower and higher natures and the separation of mind and body Intellect and emotion function in concert As color and shape are to vision one complements the other When fully integrated they cannot be taken apart The topics in the book s first half lean toward the intellectual The second half looks at the division from the emotional side What we are separating with one hand we are putting together with the other Struggle We naturally consider our problems as different from ourselves We see them in our environment and rely on our skills and insights to resolve them Our intellectual solutions address one aspect of these problems while our emotions address another Are these problems to be solved or processes to be understood What should we do if our problems are inside us Mind Your state determines your readiness arousal and self reflection Your state of mind orients your thinking how you can feel about yourself and who you re able to be Equally important are thoughts you re not likely to have or cannot have at all This book is about the states of mind that support focus awareness thoughts and feelings It s is not a guide to solving problems it s an explanation of how you see State With our state of mind we gather our thoughts and focus our attention Focus without a state is like a telescope with no one to look through it In order to focus first take full responsibility for all you think and feel The properties of your state determine what you re capable of One state of mind is not enough because you cannot understand the world from one point of view Your future is determined by your range of states of mind Wisdom Alternate states of mind support understandings we don t have They may be logical emotional spiritual or evanescent They could involve knowledge spread across generations so that no one generation has the complete picture We might call them prophetic inspired psychedelic or delusional Larger states of mind develop with experience but they re not defined by the facts they hold One needs a state of mind that can accommodate contradictions without generating conflict Instantaneous Enlightenment Change does not happen instantly but epiphanies feel instantaneous The reason is simple a new state is a whole rearrangement of one s previous conception There are no halfway states to total rearrangement Many pieces need to fall into place before we can make ourselves into something new We are at a watershed moment in our understanding of the mind after which psychology will change Instead of focusing on thoughts and behavior we are coming to understand that what s important is what you can think and how you can behave The Operating Manual is an intellectual emotional and neurological road map to the integration you don t yet have **REVIEWS** and **WORDS** of **PRAISE** What a pleasure to see the wry wit and humor of an old friend focused on that which we all take for granted our deep complex hard problem of consciousness It is not a linear treatise but a winding through the mind s
