Global Optimization in Action János D. Pintér, 2013-03-14 In science engineering and economics decision problems are frequently modelled by optimizing the value of a primary objective function under stated feasibility constraints In many cases of practical relevance the optimization problem structure does not warrant the global optimality of local solutions hence it is natural to search for the globally best solution s *Global Optimization in Action* provides a comprehensive discussion of adaptive partition strategies to solve global optimization problems under very general structural requirements A unified approach to numerous known algorithms makes possible straightforward generalizations and extensions leading to efficient computer based implementations A considerable part of the book is devoted to applications including some generic problems from numerical analysis and several case studies in environmental systems analysis and management The book is essentially self contained and is based on the author s research in cooperation on applications with a number of colleagues Audience Professors students researchers and other professionals in the fields of operations research management science industrial and applied mathematics computer science engineering economics and the environmental sciences

Frontiers in Global Optimization Christodoulos A. Floudas, Panos M. Pardalos, 2013-12-01 Global Optimization has emerged as one of the most exciting new areas of mathematical programming Global optimization has received a wide attraction from many fields in the past few years due to the success of new algorithms for addressing previously intractable problems from diverse areas such as computational chemistry and biology biomedicine structural optimization computer sciences operations research economics and engineering design and control This book contains refereed invited papers submitted at the 4th international conference on Frontiers in Global Optimization held at Santorini Greece during June 8 12 2003 Santorini is one of the few sites of Greece with wild beauty created by the explosion of a volcano which is in the middle of the gulf of the island The mystic landscape with its numerous mult extrema was an inspiring location particularly for researchers working on global optimization The three previous conferences on Recent Advances in Global Optimization State of the Art in Global Optimization and Optimization in Computational Chemistry and Molecular Biology Local and Global approaches took place at Princeton University in 1991 1995 and 1999 respectively The papers in this volume focus on deterministic methods for global optimization stochastic methods for global optimization distributed computing methods in global optimization and
