Postapocalyptic Fiction and the Social Contract Claire P. Curtis, 2010-07-17

Postapocalyptic Fiction and the Social Contract We'll Not Go Home Again provides a framework for our fascination with the apocalyptic events The popular appeal of the end of the world genre is clear in movies novels and television shows Even our political debates over global warming nuclear threats and pandemic disease reflect a concern about the possibility of such events This popular fascination is really a fascination with survival how can we come out alive And what would we do next The end of the world is not about species death but about beginning again This book uses postapocalyptic fiction as a terrain for thinking about the state of nature the hypothetical fiction that is the driving force behind the social contract The first half of the book examines novels that tell the story of the move from the state of nature to civil society through a Hobbesian a Lockean or a Rousseauian lens including *Lucifer's Hammer* by Larry Niven and Jerry Pournelle *Alas Babylon* by Pat Frank *Malevil* by Robert Merle and *Into the Forest* by Jean Hegland The latter half of the book examines Octavia Butler's postapocalyptic Parable series in which a new kind of social contract emerges one built on the fact of human dependence and vulnerability

Imagining the End James Craig Holte, 2019-11-11 *Imagining the End* provides students and general readers with contextualized examples of how the apocalypse has been imagined across all mediums of American popular culture Detailed entries analyze the development influence and enjoyment of end times narratives *Imagining the End* provides a contextual overview and individual description and analysis of the wide range of depictions of the end of the world that have appeared in American popular culture American writers filmmakers television producers and game developers inundated the culture with hundreds of imagined apocalyptic scenarios influenced by the Biblical Book of Revelation the advent of the end of the second millennium 2000 CE or predictions of catastrophic events such as nuclear war climate change and the spread of AIDS From being raptured to surviving the zombie apocalypse readers and viewers have been left with an almost endless sequence of disasters to experience *Imagining the End* examines this phenomenon and provides a

Debus,2024-10-04 The

incomprehensible notion of a very large chunk of ice or rock from outer space smashing into the Earth has only become mainstream within the past two centuries Though early writers imagined the utterly fantastic consequences of comet collisions and speculated on the devastation they might wreak it was not until the 1980s when scientists finally resolved that dinosaurs were extinguished by an asteroid 66 million years ago This startling announcement captivated the media and tilted the science fiction world but in reality history may have been punctuated repeatedly by such events This book collects and

analyzes ideas of asteroid comet and planetary impacts with Earth spanning two centuries from the first realization of extinctions in fossil records to the new millennium reflected in scores of sci fi stories films and televised science documentaries The author examines social and geopolitical fears tied to the prospect of a cosmic borne catastrophe Science fiction and speculation are artfully melded **Beyond 2012: Catastrophe or Awakening?** Geoff Stray, 2009-05-21 An illustrated encyclopedic overview of the prophecies calendars and theories that indicate the year 2012 is a threshold of great change for humanity Looks at the scientific and anthropological evidence for the rare galactic alignment due to occur in December 2012 Sifts through the catastrophic theories to show what we might really expect in 2012 In December of 2012 the Mayan Calendar s Great Cycle will come to an end Opinion remains divided as to whether apocalyptic scenarios of worldwide destruction or utopian visions of a spiritually renewed humanity will prevail after this key date has passed What is certain however is that a rare galactic alignment will occur one so unique that it is found at the core of many wisdom traditions from around the globe Geoff Stray has been collecting the vast amounts of data relating to the 2012 phenomena since 1982 Far from confining his research to the Maya who provide the most prominent predictions indicating this date will herald significant changes for humanity he has studied the prophetic traditions of other cultures including the Tibetan Chinese Jewish Ethiopian and tribal cultures from around the globe to show the kind of convergence of cosmic purposes happening along a number of parallel tracks This book offers an extensive study of many modern theories including Terence McKenna s timewave zero and Maurice Cotterell s sunspot research as well as anomalous phenomena such as near death experiences and crop circles Sifting through all the scientific research and speculation that the year 2012 has inspired Geoff Stray provides an encyclopedic look at what we might really expect on this pivotal date **Sophisticated Chaos** T. Gavin Powell, 2020-01-06 With the aim of simplifying relational database modeling Database Modeling Step by Step presents the standard approach to database normalization and then adds its own approach which is a more simplistic intuitive way to building relational database models Going from basics to contemporary topics the book opens with relational data modeling and ends with BigData database modeling following a road map of the evolution in relational modeling and including brief introductions to data warehousing and BigData modeling A break down of the elements of a model explains what makes up a relational data model This is followed by a comparison between standard normalization and a more simplistic intuitive approach to data modeling that a beginner can follow and understand A brief chapter explains how to use the database programming language SQL Structured Query Language which reads from and writes to a relational database SQL is fundamental to data modeling because it helps in understanding how the model is used In addition to the relational model the last three chapters cover important modern world topics including denormalization that leads into data warehouses and BigData database modeling The book explains how there is not much to logical data modeling in BigData databases because as they are often schema less which means that BigData databases do not have schemas embedded into the database itself they have no metadata and thus not much of a logical data model Online bonus chapters include a case study that covers relational data modeling and are available at the author s web site www.oracletroubleshooter.com/datamodeling.html

Dillow, 2020-08-04 This accessible and always entertaining Booklist combination of history pop science and in depth reporting offers a fascinating account of the asteroids that hit Earth long ago and those streaming toward us now as well as how prepared we are against asteroid caused catastrophe One of these days warns Gordon Dillow the Earth will be hit by a comet or asteroid of potentially catastrophic size The only question is when In the meantime we need to get much better at finding objects hurtling our way and if they re large enough to penetrate the atmosphere without burning up figure out what to do about them We owe many of science s most important discoveries to the famed Meteor Crater a mile wide dimple on the Colorado Plateau created by an asteroid hit 50 000 years ago In his masterfully researched Fire in the Sky Dillow unpacks what the Crater has to tell us Prior to the early 1900s the world believed that all craters on the Earth and Moon were formed by volcanic activity Not so The revelation that Meteor Crater and others like it were formed by impacts with space objects has led to a now accepted theory about what killed off the dinosaurs and it has opened up a new field of asteroid observation that is brimming with urgency Dillow looks at great asteroid hits of the past and modern day asteroid hunters and defense planning experts including America s first Planetary Defense Officer Satellite sensors confirm that a Hiroshima scale blast occurs in the atmosphere every year and a smaller one kiloton blast every month While Dillow makes clear that the objects above can be deadly he consistently inspires awe with his descriptions of their size makeup and origins Both a riveting work of popular science and a warning to not take for granted the space objects hurtling overhead Fire in the Sky is ultimately a testament to our universe s celestial wonders
