Upper Echelons' Naturalistic Decision-Making and Top Management Team Macrocognition in a High Reliability Organization Leonie Looser, 2024-04-29 The book analyzes crisis decision making of a major German airline's operational top management team during the Covid 19 crisis. The operational top manager's relevant decision making entity, the crisis management team, was faced with substantial time critical decisions in volatile circumstances as well as the need to balance ambidextrous exigencies with the organization's short term survival as well as its future viability. The author applies her ethnographic perspective and develops an analysis based on the unique combination of naturalistic decision making, top management team research, high reliability organizations and ambidexterity as well as team diversity. The work is targeted at both management professionals as it identifies best practices and learnings from a polycrisis case as well as researchers as it makes a novel contribution to decision making in the context of high reliability organizations.
