Estimator's Man-Hour Manual on Heating, Air Conditioning, Ventilating, and Plumbing John S. Page, 1978-03-03 The author has had wide experience in cost and labour estimating having worked for some of the largest construction firms in the world He has made and assembled numerous types of estimates including lump sum hard priced and scope and has conducted many time and method studies in the field and in fabricating shops John S Page has received the Award of Merit from the American Association of Cost Engineers in recognition of outstanding service and cost engineering

Estimator's Piping Man-Hour Manual John S. Page, 1999-05-24 This reference provides reliable piping estimating data including installation of pneumatic mechanical instrumentation used in monitoring various process systems

This new edition has been expanded and updated to include installation of pneumatic mechanical instrumentation which is used in monitoring various process systems **Estimator's Electrical Man-hour Manual, by J.s John S. Page,1959**

2005 National Electrical Estimator Edward J. Tyler,2004-11 If you need to estimate the cost of electrical systems in buildings this book will be your most reliable guide to selecting the right material figuring the labor time required for installation and totaling the installation cost and material price Ed Tyler was named National Estimator of the Year by the American Society of Professional Estimators His depth and breadth of knowledge make him one of the nation s foremost authorities on electrical estimating Book jacket **Cost Estimating Manual for Pipelines and Marine Structures** John S. Page,1977-01-01 From the Book Preface This manual has been compiled to provide time frames labor crews and equipment spreads to assist the estimator in capsulizing an estimate for the installation of cross country pipelines marshland pipelines nearshore and surf zone pipelines submerged pipelines wharfs jetties dock facilities single point morring terminals offshore drilling and production platforms and equipment and appurtenances installed thereon The time frames and labor and equipment spreads which appear throughout this manual are the result of many time and method studies conducted under varied conditions and at locations throughout the world these time frames and labor and equipment spreads reflect a complete unbiased view of all operations involved When one is engaged in compiling an estimate from any information furnished by others as is the case with this manual he should view it in an objective light giving due consideration to the nature of the project at hand and evaluating all items that may affect the productivity of labor and all other elements involved

Evaluating Contract Claims John Mullen,R. Peter Davison,2019-08-28 An important guide to the quantification of contract claims in the construction industry updated third edition The substantially expanded third edition of Evaluating Contract Claims puts the spotlight on the quantification of claims in the construction industry after liability has been established including by reference to the terms of several standard forms of contract in common use The authors clearly demonstrate the potential alternative approaches to quantification the processes principles and standard of analysis required to produce acceptable claims for additional payment The third edition covers a number of heads claims not considered in previous editions and offers an important guide for those working with building or engineering contracts Evaluating Contract Claims explains in detail how the base from which evaluation of additional payments may be established the effect of changes on the programme of work and the sources of information for evaluation of additional payments The book also contains information for evaluating the direct consequences of change in terms of the impact on unit rates and evaluating of the time consequences of change in terms of prolongation disruption acceleration and more This important book Concentrates on the quantification of contract claims after liability has been established Offers a guide that is appropriate for any form of contract Considers the potential alternative approaches to quantification of different heads of claim Contains the principles and methods that should be reflected in the evaluation of claim quantum Includes the standard of substantiation which may be

required Presents information that is equally applicable in both building and engineering disputes Is substantially expanded from its previous editions Written for construction and engineering contract administrators project managers quantity surveyors and contract consultants Evaluating Contract Claims offers a revised third edition to the essential guide for quantifying claims in the construction industry once liability has been established Estimator's General Construction
