Reconstruction Nathan Rose,2022-01-07 Accident reconstruction utilizes principles of physics and empirical data to analyze
 the physical electronic video audio and testimonial evidence from a crash to determine how and why the crash occurred how
 the crash could have been avoided or to determine whose description of the crash is most accurate This process draws
 together aspects of mathematics physics engineering materials science human factors and psychology and combines
 analytical models with empirical test data Different types of crashes produce different types of evidence and call for different
 analysis methods Still the basic philosophical approach of the reconstructionist is the same from crash type to crash type as
 are the physical principles that are brought to bear on the analysis This book covers a basic approach to accident
 reconstruction including the underlying physical principles that are used then details how this approach and the principles
 are applied when reconstructing motorcycle crashes This second edition of Motorcycle Accident Reconstruction presents a
 thorough systematic and scientific overview of the available methods for reconstructing motorcycle crashes This new edition
 contains Additional theoretical models examples case studies and test data An updated bibliography incorporating the newest
 studies in the field Expanded coverage of the braking capabilities of motorcyclists Updated refined and expanded discussion
 of the decelerations of motorcycles sliding on the ground A thoroughly rewritten and expanded discussion of motorcycle
 impacts with passenger vehicles Updated coefficients of restitution for collisions between motorcycles and cars A new and
 expanded discussion of using passenger car EDR data in motorcycle accident reconstruction A new section covering recently
 published research on post collision frozen speedometer readings on motorcycles A new section on motorcycle interactions
 with potholes roadway deterioration and debris and expanded coverage of motorcycle falls This second edition of Motorcycle
 Accident Reconstruction is a must have title for accident reconstructionists forensic engineers and all interested in
