efforts **Educating for Sustainability in Primary Schools** Neil Taylor, Frances Quinn, Chris Eames, 2015-06-17

Education for Sustainability is a key priority in today's schools as our society seeks to find a balance between environmental, social, cultural, political and economic imperatives that affect our future. As young children will become the next generation of adults, it is vital that they are educated about sustainability issues so that they can learn to make informed decisions and take positive action for a sustainable world. Teachers are ideally placed to educate for sustainability issues and indeed have a responsibility to do so. However, they often lack support and experience in this area and constraints of current curriculum priorities can inhibit Education for Sustainability being taught effectively in many classrooms. *Educating for Sustainability in Primary Schools: Teaching for the Future* addresses this problem by showing how Education for Sustainability can be developed within and across all areas of the primary curriculum in the Australian and New Zealand contexts. The book provides a range of educational approaches and examples of activities to support teachers in addressing national requirements for teaching the major primary curriculum learning areas while simultaneously educating for sustainability. This integrative approach to primary education can promote knowledge of positive attitudes towards and suitable action for sustainability in relevant, meaningful, enjoyable and creative ways. This book is a valuable resource for all primary teachers who wish to make a real difference to educating children for the future. [Making Humanities and Social Sciences Come Alive](#)

Allender, 2020-07-16 Effective Australian history education has never been more important for the development of critically aware and thoughtful young people. History fosters important skills in reasoning, historical consciousness and empathy and an appreciation of history is crucial to the development of students' understanding of the very nature of our society. This edited collection comprises contributions from leading historians, educators and practising teachers and surveys Australian history teaching today from the development of the national curriculum to fostering historical thinking and promoting effective engagement in the history classroom. The book begins with an analysis of the principles underlying the drafting of the national curriculum and features insights from the writers of the curriculum themselves. It focuses on the curriculum from primary and secondary school teaching perspectives. Part 2 examines the teaching of historical expertise including historical thinking and value formation as well as productive assessment and the important role social history can play in the classroom. Part 3 concentrates on specific approaches to history teaching including teacher talk, the use of historical fiction and film, digital technology and the internet as well as museums as a teaching medium. Part 4 analyses key aspects of Australian history teaching including Indigenous perspectives, teaching citizenship and assisting the pre-service teacher in their transition to becoming a professional. Rich with insights into historical skills, historical concepts and critical thinking as well as practical guidance on translating principles into engaging classroom approaches, this is an essential reference for both pre
