**ActionScript 3.0** Derrick Ypenburg, 2010-04-26 ActionScript is the programming language integral to the Adobe Technology Platform. It began as a simple scripting language for creating interactivity and animation in Flash but is now used to create full featured Web applications not only in Flash but in Flex. ActionScript 3 introduced with Flex 2 is now a full fledged object oriented programming language and the need for teaching materials for both newcomers and veterans is great. This task based tutorial is for students with no programming experience as well as those programmers who have learned earlier versions of the programming language and now need to learn the new version. The book walks a reader through all the fundamentals then moves on to creating interactivity working with data looping and decision making programming visualizations and working with multimedia. It's a complete end to end tutorial.
