God's Twofold Love William den Boer, 2010-10-27 Even though it has always been widely debated the theology of Jacob Arminius 1559 1609 has not received the scholarly attention one would expect Given also its remarkable influence it is surprising how little research has been devoted to it Only since the 1980s has the world of scholarship seen some movement on this front The present study by William den Boer offers a new contribution to the understanding of Arminius s theology by focusing on the theological motive that lay at its very foundation Arminius has been characterized as a theologian of free will of creation or of freedom and lately also as a theologian of the assurance of faith The question as to Arminius s central concern in his theology has been answered in different ways with each author focusing on aspects of differing degrees of importance William den Boer defends the thesis that another characterization needs to be added and designates Arminius as a theologian of the justice of God or more precisely as a theologian of the twofold love of God He goes on to illustrate how these two characterizations are valid at one and the same time and why they do not exclude but include all other characterizations that have been offered by placing them in their proper perspective In Part 1 the author posits that the leading motif of Arminius s theology lay in a careful defense of the justice of God Part 2 considers the reception of his theology in the discussions between Remonstrants and Counter Remonstrants during the Hague Conference Haagsche or Schriftelicke Conferentie of 1611 Finally Arminius s theology is placed within the context of sixteenth century debates on the cause of sin and God s relationship to evil

The Changing Institutional Face of British Employment

Relations Linda Dickens, Alan C. Neal, 2006-01-01 Employment protection in Britain once seen as resting on collective bargaining supported by public policy has increasingly come to be framed in terms of individual legal rights enforceable before judicial forums such as employment tribunals This dramatic shift towards juridification of the individual employment relationship has not only contributed towards significant changes to the institutional landscape of employment relations in Britain but also carries important implications for the future of employment law and regulation in the home of collective bargaining This comprehensive evaluation of current institutional reality and trends prepared to mark the 30th anniversary of the Advisory Conciliation and Arbitration Service Acas provides a unique look inside the key institutions of British employment relations Each contributor leading academics and senior practitioners all closely associated with particular institutions locates their institution in terms of purpose origins and context discusses its structure governance and composition and assesses its operation considering current challenges and future direction In the course of examining issues relating to institutional choice and roles the presentations offer contemporary views on the impact of decentralisation and the shrinking of collective bargaining decline in trade union membership and strength and the political effects of increasing global competition The influence of EU social policy initiatives upon British legislative policy is identified while attention is drawn to the consequences of an increased feminisation of the workforce along with an increasing incidence of non standard workers and continuing service sector growth Set alongside the evidence of decline in manufacturing restructuring of the public sector and the growth of the SME sector this volume demonstrates the remarkable pressures for change which have impacted upon the institutions of British employment relations over the past thirty years These essays offer an especially valuable mix of expert independent discussion along with personal insights gained from direct involvement in the operation of the key bodies As a much needed overview and basis for evaluation of the current institutional map of British employment relations as well as a contemporary consideration of lessons to be drawn from the changing institutional face of employment relations in Britain this book will be of inestimable value to policy makers and practitioners in the field as well as to students academics and more generally interested observers of the British experience
