The Atlantic Monthly ,1902 **I Don't Give a F***!** Prem Dayal,2015-11-02 I DON T GIVE A F American Mantras to Free the Spirit A Roadmap to Enlightenment for Godless Mystics Good old Socrates said all I know is that I know nothing If Socrates didn t know it imagine what it is that I don t know But there are a hell of a lot of people who say they know a lot and are therefore much smarter than I and even smarter than Socrates who certainly would not be someone to be ashamed of as a classmate There are those who speak with angels who speak with the dead with forest creatures extraterrestrials goblins and animals and the luckiest of all speak long distance with God Sadly it often happens that these same people found talking candidly with ghosts plants UFOs sheep cows and all types of beasts have serious difficulty communicating with their own children their partners or with the valet parking dude First Handbook of Psychological and Social Instruments Uday Pareek,T. Venkateswara Rao,1992 Legacy Reverend June P. Jeffries,2019-09-13 This is my story You have your own I felt very pressed to not live this life and die and not say anything to my loved ones Some people can leave wealth some will leave property and possessions Some others might leave a family recipe and other family treasures My treasure is to share my life and my love with my future descendants and give them whatever I can to cultivate their extraordinary self **Immortality Gene** John Chapman,Shelia Chapman, We fear pandemics but what if a pandemic made you immortal Book 1 in the series is FREE Dr Donna Rigden is fed up with her job When she loses the most important person in her life she makes plans to start over When this falls through she resigns big mistake Donna is now on Forrest s hit list Convinced to make a move Donna refuses to leave the US without visiting her parents and grandparents graves Ambushed at the cemetery she s shot and wakes up on her way to the UK This was not what Donna had in mind Richard Triplet rescues Donna but wants more from her than she s willing to give Feeling trapped and desperate she turns to a new friend for comfort Sir Richard Donna s new employer showers her with luxury and makes her an offer she can t refuse Once she s signed the contract he asks her to use her medical expertise to commit murder Donna s world is turned upside down Donna must make a life changing choice Once made there s no going back Was it the right choice Death strikes Sam the infirmary s doctor is ordered to give his patient an untested drug Sam knows the drug is either a cure or a curse but goes against his patient s wishes Will he stand by his Hippocratic Oath or cave and follow Sir Richard s orders Immortality Gene What about Sir Richard How does he fit into this equation What s his motivation Sir Richard Triplet is a member of a secret society who operates in the grey area on the edge of the law This makes him a target for religious fanatics and conspiracy theorists but Sir Richard knows a secret and has his own agenda He knows in the year 7141 the Earth will be destroyed by an apocalyptic collision with a rogue planetoid This scale of cataclysm will destroy all life on earth no room in the aftermath even for a dystopian civilization Should Sir Richard be concerned It s not his problem right He ll be dead and gone by then Maybe maybe not Sir Richard has a plan already in action One of the key elements in his plan is to manipulate the mechanisms of life and greatly extend the human lifespan

Does Sir Richard's quest to live forever offer our happy ever after? Let's re-evaluate this situation. If you were to become immortal, would you feel more inclined to worry about an event taking place thousands of years into the future? I would be, but what about the ethical and social implications of immortality? What about overpopulation, living space, and the diminishing food supply? What about the wars waged to control this miracle and the all-important biblical phrase Genesis 6:3? And the LORD said, "My spirit shall not always strive with man, for that he also is flesh; yet his days shall be an hundred and twenty years." Immortality Gene is the first book in the A Vested Interest series. It's based on advanced technology currently under development. Immortality Gene covers the development of a genetically engineered virus. Along the way, the series deals with corporate jealousy at its highest levels, greed, spite, vengeance, nanotechnology, medicine, murder, mystery, love, and betrayal, and of course, the very essence of life itself. The Series This full-length novel book one sets the stage for a series involving romance, suspense, science fiction, mystery, action, comedy. Paranormal wolves do play a part in the series, but no vampires, yet. Immortality Gene is a unique blend of thriller, romance, and science fiction. If you like books by Michael Crichton, Danielle Steel, and Dan Brown, stories combining complex plots, compelling characters, and scientific explanation, then you'll love Immortality Gene. Be warned: this first e-book is long, 780 pages, but usually free.
