

(Question 1 continued)

- (d) The cross-sectional area of the tube is $1.3 \times 10^{-3} \text{ m}^2$ and the temperature of air is 300 K. Estimate the number of moles of air in the tube. [2]

$$\begin{aligned}
 PV &= nRT & (b) A &= PY & \text{or } n &= \frac{LA}{RT} \\
 n &= \frac{PV}{RT} & & & & n = \frac{(5 \times 10^4)(1.3 \times 10^{-3})}{(8.3)(300)} \\
 \text{but you are given Area} &= 1.3 \times 10^{-3} \text{ m}^2 & & & & n = 0.026 \text{ mol} \\
 \text{since } \rho &= \frac{P}{V_H} \text{ or } P = \rho H & & & & n \approx 0.03 \text{ mol}
 \end{aligned}$$

- (e) The equation in (b) may be used to predict the pressure of the air at extremely large values of $\frac{1}{H}$. Suggest why this will be an unreliable estimate of the pressure. [2]

Very large $1/H$ means small volume. Small volume means high pressure.

In ideal gas law, it stated that molecules are not close to each other and hence the forces between them are negligible.

Cosmic Plasma Physics Karl Schindler, 2012-12-06 The plan to hold a conference on cosmic plasma physics originated in the Plasma Physics Division of the European Physical Society whose chairman B Lehnert took the first steps towards its realization ESRIN readily adopted this idea and preliminary contacts with a number of other groups showed that there was a good deal of interest in bringing to gether people working in different areas of the field of cosmic plasma physics It was clearly felt that an exchange of views and experience and an attempt to define problem areas would be profitable In this spirit a programme was devised which covered a large variety of topics ranging from ionospheric to galactic structures A diversified programme of this kind runs the risk that the communication between the various fields of specialization remains insufficient It was gratifying to find that within the wide field of cosmic plasma physics a lively dialogue was in fact possible The Conference was sponsored by the European Physical Society Financial support was provided by ESRO It is a pleasure to acknowledge the excellent suggestions of the programme committee members L Biermann N D Angelo R Gendrin and B Lehnert I should like to thank my colleagues B Bertotti K Lackner and J F McKenzie and numerous other ESRIN staff members for their valuable help I feel particularly indebted to the conference secretary Miss Sachs who did the real work while I just signed the letters

Learning and Understanding National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Programs for Advanced Study of Mathematics and Science in American High Schools, 2002-08-06 This book takes a fresh look at programs for advanced studies for high school students in the United States with a particular focus on the Advanced Placement and the International Baccalaureate programs and asks how advanced studies can be significantly improved in general It also examines two of the core issues surrounding these programs they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs this report provides teachers parents curriculum developers administrators college science and mathematics faculty and the educational research community with a detailed assessment that can be used to guide change within advanced study programs **Niels**

Bohr's Times Abraham Pais, 1991-10-17 The life of Niels Bohr spanned times of revolutionary change in science itself as well as its impact on society Along with Albert Einstein Bohr can be considered to be this century's major driving force behind the new philosophical and mathematical descriptions of the structure of the atom and the nucleus Abraham Pais the acclaimed biographer of Albert Einstein here traces Bohr's progress from his well to do origins in late nineteenth century Denmark to his position at centre stage in the world political scene particularly during the Second World War and the development of atomic weapons Pais description moves through the science as it was before Bohr as it became because of Bohr and thence to Bohr's scientific and philosophical legacy That legacy is contained both in theory as it is now universally enshrined as well

as in its practice in such great Danish institutions as Riso But more than that Pais captures the essence of Bohr the intensely private family figure who despite appalling personal tragedy became one of the most loved cultural figures of recent times
