The Psychology of Political Extremism Gabrielle Rifkind, 2020-11-25 Recent terrorist attacks have left the UK and Europe genuinely at sea as to how to respond to these distressing events There are the predictable interpretations with politicians on the right talking about counter terrorism harsher punishments and tightening up on the internet whilst on the political left there is talk about blaming foreign wars All this analysis is relevant but insufficient Politicians are not talking enough about why so many young people are sufficiently angry and alienated that they are prepared to be seduced by the toxic and poisonous ideology of Islamic State The Psychology of Political Extremism examines both the politics and the psychology as well as what motivates people to behave in ways that are so disturbing Freud is the hook as the founding father of the talking cure A radical and subversive theorist in his time he claimed that mankind was influenced more by the inner workings of the mind and internal conflicts than by rational thought

Visual Communication for Cybersecurity Nicole van Deursen, 2022-09-01 Cybersecurity needs a change in communication It is time to show the world that cybersecurity is an exciting and diverse field to work in Cybersecurity is not only about hackers and technical gobbledygook It is a diverse field of work with a lot of collaboration with other disciplines Over the years security professionals have tried different awareness strategies to promote their work and to improve the knowledge of their audience but without much success Communication problems are holding back advances in in the field Visual Communication for Cybersecurity explores the possibilities of visual communication as a tool to improve the communication about cybersecurity and to better connect with non experts Visual communication is useful to explain complex topics and to solve complex problems Visual tools are easy to share through social media and have the possibility to reach a wide audience When applied strategically visual communication can contribute to a people centric approach to security where employees are encouraged to actively engage in security activities rather than simply complying with the policies Cybersecurity education does not usually include communication theory or creative skills Many experts think that it is not part of their job and is best left to the communication department or they think that they lack any creative talent This book introduces communication theories and models gives practical tips and shows many examples The book can support students in cybersecurity education and professionals searching for alternatives to bullet point presentations and textual reports On top of that if this book succeeds in inspiring the reader to start creating visuals it may also give the reader the pleasure of seeing new possibilities and improving their performance
