1. A group of students investigate the motion of a conducting ball suspended from a long string. The ball is between two vertical metal plates that have an electric potential difference V between them. The ball is touched to one plate so that it becomes electrically charged and is repelled from the plate. For a given potential difference, the ball bounces between the plates with a constant period. T

- (a) The students vary V and measure the time T for the ball to move once from one plate to the other. The table shows some of the data.

V / kV	$T / \text{s} \pm 0.1 \text{s}$
3.00	1.4
5.00	0.8
7.00	0.6

- (i) V is provided by two identical power supplies connected in series. The potential difference of each of the power supplies is known with an uncertainty of 0.01 kV .

State the uncertainty in the potential difference V .

[1]

$V_{\text{total}} = V_1 + V_2$ $\Delta V = 0.01 \text{ kV} + 0.01 \text{ kV}$
 * In addition, we use $= 0.02 \text{ kV}$

Wieman,2008 Carl Wieman s contributions have had a major impact on defining the field of atomic physics as it exists today His ground breaking research has included precision laser spectroscopy using lasers and atoms to provide important table top tests of theories of elementary particle physics the development of techniques to cool and trap atoms using laser light particularly in inventing much simpler less expensive ways to do this the understanding of how atoms interact with one another and light at ultracold temperatures and the creation of the first Bose Einstein condensation in a dilute gas and the study of the properties of this condensate In recent years he has also turned his attention to physics education and new methods and research in that area This indispensable volume presents his collected papers with annotations from the author tracing his fascinating research path and providing valuable insight about the significance of the works **Sustaining TEL: From Innovation to Learning and Practice** Martin Wolpers,Paul A. Kirschner,Maren Scheffel,Stefanie Lindstaedt,Vania Dimitrova,2010-09-15 These proceedings of the fth European Conference on Technology Enhanced Learning EC TEL 2010 exemplify the highly relevant

and successful research being done in TEL. Because of this great work this year's conference focused on Sustaining TEL From Innovation to Learning and Practice. The last decade has seen significant investment in terms of time, people, and money in innovating education and training. The time has come to make the bold step from small scale innovation research and development to large scale and sustainable implementation and evaluation. It is time to show the world, i.e. government, industry, and the general population, that our field has matured to the stage that sustainable learning and learning practices both in schools and in industry can be achieved based upon our work. The present day TEL community now faces new research questions related to large scale deployment of technology enhanced learning supporting individual learning environments through mashups and social software, new approaches in TEL certification and so forth. Furthermore, new approaches are required for the design, implementation, and use of TEL to improve the understanding and communication of educational desires and the needs of all stakeholders ranging from researchers to learners, tutors, educational organizations, companies, the TEL industry, and policy makers. And the TEL community has taken up this challenge. As one can see in this volume in its fifth year, the conference was once more able to assemble the most prominent and relevant research results in the TEL area. The conference generated more than 150 submissions which demonstrate a very lively interest in the conference theme, thus significantly contributing to the conference's success.

Unsaturated Soil Mechanics in Engineering Practice
Delwyn G. Fredlund, Hendry Rahardjo, Murray D. Fredlund, 2012-07-24. The definitive guide to unsaturated soil from the world's experts on the subject. This book builds upon and substantially updates Fredlund and Rahardjo's publication *Soil Mechanics for Unsaturated Soils*, the current standard in the field of unsaturated soils. It provides readers with more thorough coverage of the state of the art of unsaturated soil behavior and better reflects the manner in which practical unsaturated soil engineering problems are solved. Retaining the fundamental physics of unsaturated soil behavior presented in the earlier book, this new publication places greater emphasis on the importance of the soil water characteristic curve in solving practical engineering problems, as well as the quantification of thermal and moisture boundary conditions based on the use of weather data. Topics covered include: Theory to Practice of Unsaturated Soil Mechanics; Nature and Phase Properties of Unsaturated Soil; State Variables for Unsaturated Soils; Measurement and Estimation of State Variables; Soil Water Characteristic Curves for Unsaturated Soils; Ground Surface Moisture Flux Boundary Conditions; Theory of Water Flow through Unsaturated Soils; Solving Saturated Unsaturated Water Flow Problems; Air Flow through Unsaturated Soils; Heat Flow Analysis for Unsaturated Soils; Shear Strength of Unsaturated Soils; Shear Strength Applications in Plastic and Limit Equilibrium; Stress Deformation Analysis for Unsaturated Soils; Solving Stress Deformation Problems with Unsaturated Soils; Compressibility and Pore Pressure Parameters; Consolidation and Swelling Processes in Unsaturated Soils. *Unsaturated Soil Mechanics in Engineering Practice* is essential reading for geotechnical engineers, civil engineers, and undergraduate and graduate level civil engineering students with a focus on soil mechanics.

Vertex Operators in Mathematics and

Physics J. Lepowsky, S. Mandelstam, I.M. Singer, 2013-03-08 James Lepowsky t The search for symmetry in nature has for a long time provided representation theory with perhaps its chief motivation According to the standard approach of Lie theory one looks for infinitesimal symmetry Lie algebras of operators or concrete realizations of abstract Lie algebras A central theme in this volume is the construction of affine Lie algebras using formal differential operators called vertex operators which originally appeared in the dual string theory Since the precise description of vertex operators in both mathematical and physical settings requires a fair amount of notation we do not attempt it in this introduction Instead we refer the reader to the papers of Mandelstam Goddard Olive Lepowsky Wilson and Frenkel Lepowsky Meurman We have tried to maintain consistency of terminology and to some extent notation in the articles herein To help the reader we shall review some of the terminology We also thought it might be useful to supplement an earlier fairly detailed exposition of ours 37 with a brief historical account of vertex operators in mathematics and their connection with affine algebras Since we were involved in the development of the subject the reader should be advised that what follows reflects our own understanding For another view see 29 1 t Partially supported by the National Science Foundation through the Mathematical Sciences Research Institute and NSF Grant MCS 83 01664 1 We would like to thank Igor Frenkel for his valuable comments on the first draft of this introduction
