possible education **Perspectives on the IB Diploma Core** Jeff Thompson, Judith Fabian, Mary Hayden, 2019-10-15 The Diploma Programme was the first programme to be devised and implemented by the International Baccalaureate over fifty years ago. Since its creation the curriculum upon which the programme is based has been continuously developed to take into account the rapidly changing needs of students, schools, higher education and employment contexts. For much of that time the programme has included three essential components that must be undertaken by students who wish to graduate with the Diploma: Theory of Knowledge, Extended Essay and Creativity Activity Service (CAS). Taken together over time these have come to be regarded as a core of the Diploma Programme although they were not described as such at the outset. This edited collection is intended to provide input into the current review of the IB Diploma Programme. It comprises contributions from experienced authors, researchers and practitioners who were invited to reflect upon the nature of the core as it exists at present, to raise issues in relation to the future development of the core and to share experience in the learning and teaching of the core components across a wide range of schools in both national and international systems of education. Questions concerning the concept of the core as a whole, developing students as internationally minded thinkers and the challenges of bringing coherence to the core in establishing a holistic approach to the curriculum underpin the individual chapters throughout. Contributors: Edward Allanson, Tom Brodie, John Cannings, Christian Chiarenza, Mary Donnellan, Jenny Gillett, Robin Julian, Julian Kitching, Justin Laleh, Ann Lautrette, James MacDonald, Shona McIntosh, Heather Michael, Paul Regan, John Royce, John Sprague, George Walker. **IB World Schools Yearbook 2011** Wendy Bosberry-Scott, 2011 This yearbook is the official guide to schools offering the International Baccalaureate Diploma, Middle Years and Primary Years programmes. It tells you where the schools are and what they offer and provides up to date information about the IB programmes and the International Baccalaureate Organization. **Quicklook at Education** Alan Pritchard, 2012-08-01 A layman's guide to education in a 90 minute read. **College Knowledge** David T. Conley, 2008-01-28 Although more and more students have the test scores and transcripts to get into college, far too many are struggling once they get there. These students are surprised to find that college coursework demands so much more of them than high school. For the first time they are asked to think deeply, write extensively, document assertions, solve non-routine problems, apply concepts and accept unvarnished critiques of their work. College Knowledge confronts this problem by looking at the disconnect between what high schools do and what colleges expect and proposes a solution by identifying what students need to know and be able to do in order to succeed. The book is based on an extensive three year project sponsored by the Association of American Universities in partnership with The Pew Charitable Trusts. This landmark research identified what it takes to succeed in entry level university courses. Based on the project's findings and interviews with students, faculty and staff, this groundbreaking book delineates the cognitive skills and subject area knowledge that college bound students need to master in order to succeed in today's colleges and universities. These Standards for Success cover the major subject areas of English, mathematics, natural
