SKLOIS Conference on Information Security and Cryptography CISC 2005 was organized by the State Key Laboratory of Information Security of the Chinese Academy of Sciences It was held in Beijing China December 15 17

2005andwassponsoredbytheInstituteofSoftware theChineseAcademy of Sciences the Graduate School of the Chinese Academy of Sciences and the National Science Foundation of China The conference proceedings represe ing invited and

contributed papers are published in this volume of Springer's Lecture Notes in Computer Science LNCS series. The area of research covered by CISC has been gaining importance in recent years and a lot of fundamental experimental and applied work has been done advancing the state of the art. The program of CISC 2005 covered numerous fields of research within the general scope of the conference. The International Program Committee of the conference received a total of 196 submissions from 21 countries. Thirty-three submissions were selected for presentation as regular papers and are part of this volume. In addition to this track, the conference also hosted a short paper track of 32 presentations that were carefully selected as well. All submissions were reviewed by experts in the relevant areas and based on their ranking and strict selection criteria, the papers were selected for the various tracks. We note that stricter criteria were applied to papers co-authored by program committee members. We further note that obviously no member took part in influencing the ranking of his or her own submissions.

Informationweek, 2005 **CIO**, 2005-09-15 CIO magazine launched in 1987 provides business technology leaders with award-winning analysis and insight on information technology trends and a keen understanding of IT's role in achieving business goals. **PC World**, 2005 **CIO**, 2005-11-15 Handbook of Communication in the Public Sphere

Ruth Wodak, Veronika Koller, 2008-08-27 As you are reading this, you are finding yourself in the ubiquitous public sphere that is the Web. Ubiquitous and yet not universally accessible. This volume addresses this dilemma of the public sphere which is by definition open to everyone but in practice often excludes particular groups of people in particular societies at particular points in time. The guiding questions for this collection of articles are therefore: Who has access to the public sphere? How is this access enabled or disabled? Under what conditions is it granted or withheld and by whom? We regard the public sphere as the nodal point for the discourses of business, politics and media and this basic assumption is also reflected in the structure of the volume. Each of these three macro-topics comprises chapters by international scholars from a variety of disciplines and research traditions who each combine up-to-date overviews of the relevant literature with their own cutting-edge research into aspects of different public spheres such as corporate promotional communication, political rhetoric or genre features of electronic mass media. The broad scope of the volume is perhaps best reflected in a comprehensive discussion of communication technologies ranging from conventional spoken and written formats such as company brochures, political speeches and TV shows to emerging ones like customer chat forums, political blogs and text messaging. Due to the book's wide scope, its interdisciplinary approach and its clear structure, we are sure that whether you work in communication and media studies, linguistics, political science, sociology or marketing, you will find this handbook an invaluable guide offering state-of-the-art literature reviews and exciting new research in your field and adjacent areas.
