*Intelligence in Ape and Man (Psychology Revivals)* David Premack, 2014-01-27 What is language and what is the nature of the intelligence that can acquire it This volume originally published in 1976 describes 10 years of research devoted to these questions The author describes his programmatic research of decomposing language into atomic constituents designing and applying training programs for teaching these to chimpanzees and for teaching chimps major human ontological categories as well as for interrogative declarative and imperative sentence forms The volume details the progress from teaching apes simple predicates such as same different to more complex predicates such as if then and the success of the program led to the following questions directly related to intelligence What made the training program effective What is the cognitive equipment of the species which enables it to learn language What does this tell us about human intelligence The answers were suggested in terms of conceptual structure representational capacity memory and the ability to handle second order relations The results of this experimentation which resulted in synonymy in some animals shed light not only on the nature of language but the nature of intelligence as well One of the earliest ape language and intelligence studies today this classic can be read and enjoyed again in its historical context

**Ability** Victoria Hazlitt, 2013-11-26 Originally published in 1926 the first part of this book attempted to formulate a theory of ability in the light of recent experimental results of the time It discusses the nature of intelligence and the problem of special abilities and includes a study of some typical forms of genius The second part gives an account of a three years experimental study of special abilities in arts and science respectively carried out upon university students Samples of the tests employed are included The results are presented in non technical form Victoria Hazlitt was a pioneer of experimental psychology which was particularly significant as a woman in the early twentieth century In many cases her work anticipated later developments

in psychology by many years Today it can be enjoyed in its historical context      **Educational Psychology** Charles Hubbard Judd,1939      *The Animal's Defender and Zoophilist* ,1892      **Journal of American Culture** ,1996      *The New Republic* ,1953      Arts & Humanities Citation Index ,1980 A multidisciplinary index covering the journal literature of the arts and humanities It fully covers 1 144 of the world s leading arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social science journals      **Subject Guide to Books in Print** ,1993

*The Mentality of Apes* Wolfgang Köhler,1925 This book contains the results of my studies in the intelligence of Apes at the Anthropoid Station in Tenerife from the years 1913 1917 The original which appeared in 1917 has been out of print for some time I have taken this opportunity of making a few changes in the critical and explanatory sections and have added as an Appendix some general considerations on the Psychology of Chimpanzees With various recent books and essays on the subject I shall have an opportunity of dealing in a further contribution to the subject not yet completed Preface      **The Thinking Ape** Richard W. Byrne,1995 This text describes how human ancestors reached the point in cognitive evolution from which the evolution of modern humans was possible Rather than speculating about the mental abilities of fossil hominids on the basis of modern human psychology the author explores earlier phases of evolution with the more solid and testable evidence of human ancestry that is still alive modern primates and other animals      **The Mentality of Apes** Wolfgang Kohler,2017 Wolfgang Koehler demonstrated that chimpanzees could solve problems by applying insight His research showed that the intellectual gap between humans and chimpanzees was much narrower than previously thought The work was revolutionary when originally published in 1917 in German but it was largely ignored for decades because it violated the conventional wisdom that animal behavior is simply the result of instinct or conditioning However Koehler s research showed this was not the case He used four chimps in his experiments Chica Grande Konsul and Sultan The experiments consisted of placing chimpanzees in an enclosed area and presenting them with a desired object that was out of reach In one experiment Koehler placed bananas outside Sultan s cage and two bamboo sticks inside his cage which needed to be put together to reach the bananas Koehler demonstrated the solution to Sultan by putting his fingers into the end of one of the sticks After some contemplation Sultan put the two sticks together and was able to reach the bananas As Jaan Valsiner shows in his introduction to this classic work Koehler s analysis of the intelligence of apes marked a turning point in the psychology of thinking and the continuing struggle between behaviorism and cognitive psychology Koehler achieved his two fold aim to determine the relationship between the intellectual capacity of higher primates and man and to gain insight into the nature of intelligent acts Provided by publisher      **Intelligence of Apes and Other Rational Beings** Duane M. Rumbaugh,David A. Washburn,2008-10-01 What is animal intelligence In what ways is it similar to human intelligence Many behavioral scientists have realized that animals can be rational can think in abstract symbols can understand and react to human speech and can learn through observation as well as conditioning many of the more complicated skills of life Now

Duane Rumbaugh and David Washburn probe the mysteries of the animal mind even further identifying an advanced level of animal behavior emergents that reflects animals natural and active inclination to make sense of the world Rumbaugh and Washburn unify all behavior into a framework they call Rational Behaviorism and present it as a new way to understand learning intelligence and rational behavior in both animals and humans Drawing on years of research on issues of complex learning and intelligence in primates notably rhesus monkeys chimpanzees and bonobos Rumbaugh and Washburn provide delightful examples of animal ingenuity and persistence showing that animals are capable of very creative solutions to novel challenges The authors analyze learning processes and research methods discuss the meaningful differences across the primate order and point the way to further advances enlivening theoretical material about primates with stories about their behavior and achievements The Mind of an Ape David Premack, Ann J. Premack, 1984 An account of the authors work with teaching chimpanzees to use a symbolic language addresses questions of language thought intention and understanding

**'Language' and Intelligence in Monkeys and Apes** Sue Taylor Parker, Kathleen Rita Gibson, 1994-01-28 This is the first collection of articles completely and explicitly devoted to the new field of comparative developmental evolutionary psychology that is to studies of primate abilities based on frameworks drawn from developmental psychology and evolutionary biology These frameworks include Piagetian and neo Piagetian models as well as psycholinguistic ones The articles in this collection originating in Japan Spain Italy France Canada and the United States represent a variety of backgrounds in human and nonhuman primate research including psycholinguistics developmental psychology cultural and physical anthropology ethology and comparative psychology The book focuses on such areas as the nature of culture intelligence language and imitation the differences among species in mental abilities and developmental patterns and the evolution of life histories and of mental abilities and their neurological bases The species studied include the African grey parrot cebus and macaque monkeys gorillas orangutans and both common and pygmy chimpanzees *The Evolution of Thought* Anne E. Russon, David R. Begun, 2007-07-23 Research on the evolution of higher intelligence rarely combines data from fields as diverse as paleontology and psychology In this volume we seek to do just that synthesizing the approaches of hominoid cognition psychology language studies ecology evolution paleoecology and systematics toward an understanding of great ape intelligence Leading scholars from all these fields have been asked to evaluate the manner in which each of their topics of research inform our understanding of the evolution of intelligence in great apes and humans The ideas thus assembled represent a comprehensive survey of the various causes and consequences of cognitive evolution in great apes The Evolution of Thought will therefore be an essential reference for graduate students and researchers in evolutionary psychology paleoanthropology and primatology **The Mentality of Apes** Wolfgang Köhler, 1925 **Reaching Into Thought** Anne E. Russon, Kim A. Bard, Sue Taylor Parker, 1998-11-26 What special qualities of mind set the great apes apart from other nonhuman primates and indeed from ourselves In this book field and laboratory researchers show that the great

apes have high level abilities in both social and ecological domains including tool use pretense self awareness deception consolation teaching and culture itself Great apes are also shown to be capable of thinking at symbolic levels traditionally considered to be uniquely human Here the mechanisms involved in building these abilities especially the lengthy developmental and enculturation processes are emphasized showing how new discoveries are changing views on how primates and human intelligence evolved This book is for anyone interested in current research and theoretical views of great ape cognition      Machiavellian Intelligence II Andrew Whiten, Richard W. Byrne, 1997-09-25 This book aims to explain the intelligence of monkeys and apes and the huge brain expansion that marked human evolution In 1988 Machiavellian Intelligence was the first book to assemble the early evidence suggesting a new answer that the evolution of intellect was primarily driven by selection for manipulative social expertise within groups where the most challenging problem faced by individuals was dealing with their companions Since then a wealth of new information and ideas has accumulated This new book will bring readers up to date with the most important developments extending the scope of the original ideas and evaluating them empirically from different perspectives It is essential reading for reseachers and students in many different branches of evolution and behavioral sciences primatology and philosophy      **The Thinking Ape** Richard Byrne, 1995
