Internationalized Armed Conflicts in International Law Kubo Macak,2018-07-19 This book provides the first comprehensive analysis of factors that transform a prima facie non international armed conflict NIAC into an international armed conflict IAC and the consequences that follow from this process of internationalization It examines in detail the historical development as well as the current state of the relevant rules of international humanitarian law The discussion is grounded in general international law complemented with abundant references to case law and illustrated by examples from

twentieth and twenty first century armed conflicts In Part I the book puts forward a thorough catalogue of modalities of conflict internationalization that includes outside intervention State dissolution and recognition of belligerency It then specifically considers the legal qualification of complex situations that feature more than two conflict parties and contrasts the mechanism of internationalization of armed conflicts with the reverse process of de internationalization Part II of the book challenges the conventional wisdom that members of non State armed groups do not normally benefit from combatant status It argues that the majority of fighters belonging to non State armed groups in most types of internationalized armed conflicts are in fact eligible for combatant status Finally Part III turns to belligerent occupation traditionally understood as a leading example of a notion that cannot be transposed to armed conflicts occurring in the territory of a single State By contrast the book argues in favour of the applicability of the law of belligerent occupation to internationalized armed conflicts
