OIML Bulletin ,2008 High-level Petri Nets Kurt Jensen,Grzegorz Rozenberg,2012-12-06 High level Petri nets are now widely used in both theoretical analysis and practical modelling of concurrent systems The main reason for the success of this class of net models is that they make it possible to obtain much more succinct and manageable descriptions than can be obtained by means of low level Petri nets while on the other hand they still offer a wide range of analysis methods and tools The step from low level nets to high level nets can be compared to the step from assembly languages to modern programming languages with an elaborated type concept In low level nets there is only one kind of token and this means that the state of a place is described by an integer and in many cases even by a boolean value In high level nets each token can carry complex information which e g may describe the entire state of a process or a data base Today most practical applications of Petri nets use one of the different kinds of high level nets A considerable body of knowledge exists about high level Petri nets this includes theoretical foundations analysis methods and many applications Unfortunately the papers on high level Petri nets have been scattered throughout various journals and collections As a result much of this knowledge is not readily available to people who may be interested in using high level nets *Constructing Predictable Real Time Systems* Alexander D. Stoyenko,2012-12-06 Digital Computer Applications to Process Control R. Isermann,H. Kaltenecker,2014-05-20 Digital Computer Applications to Process Control presents the developments in the application of digital computers to the control of technical processes This book discusses the control principles and includes as well direct feedback and feed forward control as monitoring and optimization of technical processes Organized into five parts encompassing 77 chapters this book begins

with an overview of the two categories of microprocessor systems This text then discusses the concept of a sensor controlled robot that adapts to any task assures product quality and eliminates machine tending labor Other chapters consider the ergonomic adaptation of the human operator s working conditions to his abilities This book discusses as well the self tuning regulator for liquid level in the acetic acid evaporator and its actual performance in production The final chapter deals with algebraic method for deadbeat control of multivariable linear time invariant continuous systems This book is a valuable resource for electrical and control engineers

Advances in Petri Nets 1993 Grzegorz Rozenberg,1993-05-27 The main aims of the series of volumes Advances in Petri Nets are to present to the outside scientific community a fair picture of recent advances in the area of Petri nets and to encourage those interested in the applications and the theory of concurrent systems to take a closer look at Petri nets and then join the group of researchers working in this fascinating and challenging area This volume is based on the proceedings of the 12th International Conference on Applications and Theory of Petri Nets held in Gjern Denmark in June 1991 It contains 18 selected and revised papers covering all aspects of recent Petri net research
