Perspectives on Literacy in Early Childhood Education Olivia Saracho, Bernard Spodek, 2002-04-01 This volume identifies and critically analyzes research studies related to the critical skills, environments, and adult interactions that contribute to young children's literacy development. The volume reminisces on the reformation that has emerged in the language and literacy education of young children. Prior to the 1960s, few studies were available on pre-first grade literacy. Then, studies began to emerge in the 1960s focusing on the reading readiness paradigm and on the conventional assumption that literacy development was only introduced when children experienced formal reading instruction in school. Sulzby and Teale (1986) Fortunately, Durkin (1966) found that there were children reading before first grade and determined that the reading readiness paradigm was theoretically and pragmatically incongruous. Others followed Durkin's footsteps. Sulzby and Teale (1986) identify the following concepts about young children's acquisition of literacy learning: 1. Literacy development originates well before children are introduced to formal instruction. 2. The notion that reading precedes writing or that

writing precedes reading is a fallacy 3 Literacy blooms in real life settings and by performing real life activities that are used to get things done 4 The purposes of literacy for young children are as important in learning about writing and reading as are the dimensions of literacy 5 Children s cognitive development is important to their acquisition of literacy during the years from birth to six 6 Children learn written language when they actively engage in their world Competent teachers throughout the United States suggest that prior to attending school children have acquired a distinctive culture collection of experiences and group of abilities Vacca Vacca 2000 Many prekindergarten children have been in a group setting for three and four years such as a child care setting where teachers and caregivers teach them reading and writing

Narratives in Early Childhood Education Susanne Garvis, Niklas Pramling, 2017-05-08 Over the past few decades a growing body of literature has developed which examines children s perspectives of their own lives viewing them as social actors and experts in their understanding of the world Focusing specifically on narratives this unique and timely book provides an analysis of these new directions in contemporary research approaches to explore the lived experiences of children and teachers in early childhood education in addition to presenting original research on children s narratives The book brings together a variety of well regarded international researchers in the field to highlight the importance of narrative in young children s development from local and global perspectives While narrative is clearly understood within different countries this is one of the first texts to build an international understanding acknowledging the importance of culture and context It presents up to date research on the latest research methods and analysis techniques using a variety of different approaches in order to critically reflect on the future for narrative research and its insights into early childhood education Narratives in Early Childhood Education will be of interest to postgraduate students academics and researchers in early childhood education as well as early childhood professionals government policy makers and early childhood organisations and associations
