Transforming Research Excellence McLean, Robert ,Tijssen, Robert,Wallace, Matthew L.,Kraemer-Mbula, Erika,2020-01-18 Modern day science is under great pressure A potent mix of increasing expectations limited resources tensions between competition and cooperation and the need for evidence based funding is creating major change in how science is conducted and perceived Amidst this perfect storm is the allure of research excellence a concept that drives decisions made by universities and funders and defines scientists research strategies and career trajectories But what is excellent science And how to recognise it After decades of inquiry and debate there is still no satisfactory answer Are we asking the wrong question Is reality more complex and excellence in science more elusive than many are willing to admit And how should excellence be defined in different parts of the world particularly in lower income countries of the Global South where science is expected to contribute to pressing development issues despite often scarce resources Many wonder whether the Global South is importing with or without consenting the flawed tools for research evaluation from North America and Europe that are not fit for purpose This book takes a critical view of these issues touching on conceptual issues and practical problems that inevitably emerge when excellence is at the center of science systems Emerging from the capacity building work of the Science Granting Councils Initiative in sub Saharan Africa it speaks to scholars as well as to managers and funders of research around the world Confronting sticky problems and uncomfortable truths the chapters contain insights and recommendations that point towards new solutions both for the Global South and the Global North

Academic Libraries in Africa Maria Frahm-Arp,2023-12-31 This book offers an interesting overview of academic libraries and the communities they serve in Africa The book explores the work of academic libraries from a number of different countries primarily in Sub Saharan Africa One of the valuable contributions that the book makes is to highlight the numerous innovative ways in which librarians at African universities have been using their often limited resources to ensure

students and academics get continual access to worldclass information The book explores various examples of best practice in challenging circumstances such as unstable electricity and the COVID pandemic With its mix of practical solutions to and critical thinking about the complex issues facing libraries in the Global South this book is a must read for librarians who are embracing the Fourth Industrial Revolution and activity working towards achieving the United Nations Sustainable Goals in their countries

Stimulating agricultural technology adoption: Lessons from fertilizer use among Ugandan potato farmers
Nazziwa-Nviiri, Lydia, Van Campenhout, Bjorn, Amwonya, David, 2017-02-17

In the context of a growing population in an already densely populated area agricultural yields will need to increase without putting additional stress on the environment The adoption of modern inputs by smallholders is an important ingredient of agricultural transformation In this study we explore plot level household level and institutional level characteristics associated with agricultural technology adoption behavior among smallholder farmers The aim is to uncover correlations that can guide the design of policies and incentives that are likely to increase adoption We explicitly differentiate between fixed costs that are likely to affect the decision to use the technology and variable costs that are more relevant for the decision regarding use intensity In addition we examine how the importance of each of these characteristics differs with asset status To do so we use data from about 1 880 potato plots cultivated by 500 randomly selected potato growers in southwestern Uganda We first categorize households into poorly endowed and well endowed asset classes based on their access to productive assets We then estimate double hurdle models for take up and use intensity of fertilizer for each group The results show that the factors associated with the decision to use fertilizer are often different from those associated with the decision about how much fertilizer to use and that the characteristics correlated with fertilizer adoption differ between asset poor and asset rich farmers For instance asset poor female headed households are less likely to use fertilizer but if they do they use more of it than male headed households Our results also suggest fertilizer packaging and distribution are important factors in fertilizer adoption decisions due to their impact on costs related to both indivisibilities and uncertainty about the quality We derive a range of policy recommendations
