*Doing Effective Fieldwork* Elia Shabani Mlilo, 2013-03-13 We live in a context of change whereby postmodernity shapes our understanding and our searching for truth Postmodernity dictates not only what kind of results we obtain in our researches but also on the ways we use to search for truth This means that postmodernity dictates the ways we do research in various disciplines the ways we use to analyze the research results and the ways we use to communicate the findings

Postmodernity is the paradigm in which we are greatly concerned What is the place of rules of research research ethics selection of the problem and designing of research as we consider the context whereby nothing absolute can be envisaged How should one review the literature to suit this postmodern understanding of reality How should one argue his or her case This book is designed to help students in higher learning institutions learn qualitative research methods in classrooms or by themselves It moves students and researchers from modern ways of understanding doing and communicating qualitative research towards postmodern challenges and promises In this case the book is worthy reading to every serious student and researcher who seeks to equip oneself to the current issues of qualitative research methodology

*All Things Wise and Wonderful* E. Janet Warren, 2021-01-19 The Covid 19 pandemic provoked many questions It is human nature to want to know how and why things happen The sovereign God has created a beautiful intricate world in which multiple factors interact to cause an event We are called to properly understand creation but often fail because we tend to be lazy fearful and self serving We make judgments based on often incorrect assumptions about cause and effect relations and we seek reassuring explanations for both trivial and serious events Christians have the added complication of figuring out God's role in making things happen All Things Wise and Wonderful examines what the Bible and Christian theology say about cause and effect how science views causation in the world and how human mind brains judge causation Using illustrations from everyday life it offers guidance for Christians to

think and act wisely with respect to how and why things happen in creation      Narrative Constellations Susanne Garvis, 2015-07-23 Narrative research in contemporary times can free social scientists from the rhetorical forms Emihovich 1995 that alienate children and families from their own traditions Through the use of narrative we are able to recognise the power of subjectivity in allowing open dialogue and co construction of meaning Becoming comfortable with narrative research also means accepting ideas that the world has no fixed rules for assigning behaviour Emihovich 1995 This means that open dialogue is required to build consensus around shared meaning and to ensure the inclusion of multiple voices The book begins with a theoretical overview of narrative genre before focusing on narrative constellations Three constellations are then shared with the reader The final chapter provides ideas about the future of narrative constellation in research and the impact constellations can have for future policy and practice It is hoped that the reader develops a better understanding of narrative ways and begins to see the potential of narrative constellations in the research genre Dr Susanne Garvis is a professor of child and youth studies at the University of Gothenburg Sweden She has previously worked in Australian universities and is an adjunct academic with Griffith University Australia Professor Garvis has experience with narrative approaches in early childhood education and care She has researched the lives of teachers families and children She is particularly interested in representations of lived experience and the power of stories in research      **Sport**

tardiness but not actual criminal behavior The Prison School examines how and why public schools take a punitive approach to education and analyzes how this criminalizing mode influences a student's approach toward correctional custody How did schools and prisons two very different kinds of public institutions become so intertwined and what does this combination mean for students communities and ultimately a democratic society How do we begin to unravel the ties that bind the racialized realities of mass school failure and mass incarceration And what does this mean to segments of the population in particular African American males who have been systematically removed from their schools and their society Provided by publisher
