School Science Practical Work in Africa Umesh Ramnarain, 2020-06-01 School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry based learning which signals a definite paradigm shift from the traditional teacher dominated to a learner centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work and professional development in teaching practical work. This book will be of great interest to academics, researchers and post graduate students in the fields of science education and educational policy.

**Soil and Drought** Rattan Lal, 2023-12-29 Drought a serious global issue is being aggravated by climate change. Both pedological and agronomic droughts are major risk factors with adverse effects on agronomic productivity, food and nutritional security and human wellbeing. This volume in the Advances in Soil Sciences series provides research information regarding case studies from diverse agro ecoregions around the world and lists examples of effective management of drought at farm, state, national, regional and global scales. Features: Considers processes, factors and causes of pedological and agronomic droughts. Discusses effects of global warming on soil drought and describes management options to enhance drought resilience of agricultural soils. Focuses on specific case studies along with review of a variety of tools and techniques designed to mitigate drought and reduce its impact on agronomic productivity. Includes information on soil health and its effects on drought. In addition to highlighting the scientific accomplishments of Dr Bobby A Stewart, this book is a major contribution to the global issue of drought management and its dynamics in relation to soil properties under changing climate. It is reference material for researchers, students, practitioners and policymakers in soil science, agronomy, ecology and management of natural resources with specific focus on adaptation and mitigation of climate change, restoration of soil health, strengthening of biodiversity and promoting the strategy for advancing the Sustainable Development Goals or Agenda 2030 of the United Nations.
