The Marketing / Accounting Interface Robin Roslender, Richard M.S.

Wilson, 2013-09-13 When marketing managers and financial managers join forces within any business the result can often be poor communication on financial criteria and goals The risk of this situation occurring is inevitably present when those with different professional backgrounds and roles are working in accordance with their own norms In his seminal 1956 paper on general systems theory the economist Kenneth Boulding referred to the phenomenon of specialised ears and generalised deafness which can be seen to exist when marketing managers are financially illiterate or when financial managers lack the necessary insights to design implement and operate accounting systems which are useful to marketing managers in carrying

out their roles It is increasingly difficult to attach credence to the idea of marketing managers who lack financial skills or financial managers who fail to relate to the context in which marketing managers operate Understanding the marketing accounting interface is therefore important in generating emergent properties from the interaction of marketers and accountants whereby the whole is greater than the sum of the parts The chapters in this volume seek to address this challenge This book was originally published as a special issue of the Journal of Marketing Management Accounting Essentials for Hospitality Managers Chris Guilding,2012-05-31 For non accountant hospitality managers accounting and financial management is often perceived as an inaccessible part of the business yet understanding is crucial for success Using an easy to read style this book provides a comprehensive overview of the most relevant accounting information for managers It demonstrates how to organize and analyze accounting data to help make informed decisions with confidence With its highly practical approach this book quickly develops the reader s ability to adeptly use and interpret accounting information to further organizational decision making and control demonstrates how an appropriate analysis of financial reports can drive your business strategy forward from a well informed base develops mastery of the key accounting concepts through financial decision making cases that take a hospitality manager s perspective on an issue sets financial problems in the context of a range of countries and currencies includes two new chapters on internal control and performance management offers further resources at www.routledge.com/tourism including a suite of worked contextualized cases in Tourism Events and Sport Management The all new companion website includes the suite of contextualised examples PowerPoint lectures aligned to each chapter solutions to all end of chapter problems a student revision test bank and a password protected test bank available to lecturers who adopt this book as required student reading These resources are SCORM compliant and compatible with institutions Learning Management Systems
