Reaching Outward and Upward Ian MacPherson, 2012-06-01 As the year 2013 and the fiftieth anniversary of the University of Victoria approaches Ian MacPherson offers a comprehensive history of one of Canada's most progressive and visually beautiful campuses A reflection on the people history and legacy of UVic once known as Victoria College a satellite of McGill University *Reaching Outward and Upward* brings five decades of learning to life From its beginnings in 1963 serving a mere handful of students in a hastily developed site UVic has grown to become one of Canada's leading universities serving over 20 000 students on one of Canada's most stunning university campuses Ian MacPherson examines how this transformation took place despite some difficult phases and all the challenges that accompany institutional transitions the development of new faculties growing student numbers struggles over funding equity issues and computerisation He looks at the university's development during the presidencies of Howard Petch 1975 1990 David Strong 1990 2000 and David Turpin 2000 present and suggests that new ways of knowing changed established disciplines and created new alliances among students and faculty and led to the creation of the numerous research centres for which Uvic is well known A visually rich book including pictures quotations and sidebars *Reaching Outward and Upward* is above all a story of the communities on campus off campus local national international physical and electronic that together form the University of Victoria

Failure Vicki E. Alger, 2016-07-01 A comprehensive account and frank assessment of federal involvement in education is long overdue Education policy expert Vicki E Alger remedies this deficiency with her book *Failure The Federal Miseducation of America's Children* As its title indicates *Failure* makes no effort to sugar coat its findings Created in 1979 after a lobbying campaign that spanned generations the Department of Education has failed to live up to its promises Federal involvement whether related to testing funding or academic curricula has failed to abide by the Constitution's implication that education must remain the domain only of state and local governments and private institutions Most of all the central government's pervasive meddling in education has failed America's school children and their parents Education policy has long been mired in controversies often with opposing sides missing the mark *Failure* helps us step back from the skirmish du jour and redirects our focus to the big picture showing us what's gone wrong over the decades and the institutional causes of these failures It also offers a bold blueprint for returning the federal government to its constitutional role and for cultivating an educational system that meets the needs of students and parents rather than bureaucrats Concerned citizens of every stripe will benefit from *Failure's* history of federal education policy its brutally honest report card for the Department of Education its look at education systems across the globe and its ambitious policy recommendations *Failure* might even succeed in reframing the way the federal education establishment thinks about education policy *Complete Book of Colleges, 2011 Edition* Princeton Review (Firm), 2010-08-03 Lists more than 1 600 colleges and universities and provides information about admissions and academic programs *Show Me the Evidence* Ron Haskins, Greg Margolis, 2014-12-01 The first

comprehensive history of the Obama administration's evidence-based initiatives. From its earliest days, the Obama administration planned and enacted several initiatives to fund social programs based on rigorous evidence of success. Ron Haskins and Greg Margolis tell the story of six spanning preschool and K-12 education, teen pregnancy, employment and training, health, and community-based programs. Readers will appreciate the fast-moving descriptions of the politics and policy debates that shaped these federal programs and the analysis of whether they will truly reshape federal social policy and greatly improve its impacts on the nation's social problems. Based on interviews with 134 individuals including advocates, officials at the Office of Management and Budget and the Domestic Policy Council, Congressional staff, and officials in the federal agencies administering the initiatives, as well as Congressional and administration documents and news accounts, the authors examine each of the six initiatives in separate chapters. The story of each initiative includes a review of the social problem the initiative addresses, the genesis and enactment of the legislation that authorized the initiative, and the development of the procedures used by the administration to set the evidence standard and evaluation requirements, including the requirements for grant applications and awarding of grants.

Optimization and Applications Milojica Jaćimović, Michael Khachay, Vlasta Malkova, Mikhail Posypkin, 2020-01-08. This book constitutes the refereed proceedings of the 10th International Conference on Optimization and Applications OPTIMA 2019 held in Petrovac, Montenegro in September-October 2019. The 35 revised full papers presented were carefully reviewed and selected from 117 submissions. The papers cover such topics as optimization, operations research, optimal control, game theory, and their numerous applications in practical problems of operations research, data analysis, and software development.

The Schenley Experiment Jake Oresick, 2017-04-14. The Schenley Experiment is the story of Pittsburgh's first public high school, a social incubator in a largely segregated city that was highly, even improbably, successful throughout its 156-year existence. Established in 1855 as Central High School and reorganized in 1916 as Schenley High School, it was a model of innovative public education and an ongoing experiment in diversity. Its graduates include Andy Warhol, actor Bill Nunn, and jazz virtuoso Earl Hines, and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of investment as well as destructive neglect, the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt. Integrated decades before *Brown v. Board of Education*, Schenley succumbed to de facto segregation during the white flight of the 1970s; it rose again to prominence in the late 1980s when parents camped out in six-day-long lines to enroll their children in visionary superintendent Richard C. Wallace's reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008, citing over \$50 million in necessary renovations, a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents, and hundreds of first-person accounts drawn from a community indelibly

tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America s oldest public schools

Virtual Fundamental Cycles in Symplectic Topology John W. Morgan,Dusa McDuff,Mohammad Tehrani,Kenji Fukaya,Dominic Joyce,2019-04-12 The method of using the moduli space of pseudo holomorphic curves on a symplectic manifold was introduced by Mikhail Gromov in 1985 From the appearance of Gromov s original paper until today this approach has been the most important tool in global symplectic geometry To produce numerical invariants of these manifolds using this method requires constructing a fundamental cycle associated with moduli spaces This volume brings together three approaches to constructing the virtual fundamental cycle for the moduli space of pseudo holomorphic curves All approaches are based on the idea of local Kuranishi charts for the moduli space Workers in the field will get a comprehensive understanding of the details of these constructions and the assumptions under which they can be made These techniques and results will be essential in further applications of this approach to producing invariants of symplectic manifolds

presents interesting contributions related to belief functions in general published or presented along the years since 2015. These contributions are related with decision making under uncertainty, belief approximations, probability transformations, new distances between belief functions, non classical multi criteria decision making problems with belief functions, generalization of Bayes theorem, image processing, data association, entropy and cross entropy measures, fuzzy evidence numbers, negator of belief, mass human activity recognition, information fusion for breast cancer therapy, imbalanced data classification and hybrid techniques mixing deep learning with belief functions as well. We want to thank all the contributors of this fifth volume for their research works and their interests in the development of DSMT and the belief functions. We are grateful as well to other colleagues for encouraging us to edit this fifth volume and for sharing with us several ideas and for their questions and comments on DSMT through the years. We thank the International Society of Information Fusion www.isif.org for diffusing main research works related to information fusion including DSMT in the international fusion conferences series over the years. Florentin Smarandache is grateful to The University of New Mexico U S A that many times partially sponsored him to attend international conferences, workshops and seminars on Information Fusion. Jean Dezert is grateful to the Department of Information Processing and Systems DTIS of the French Aerospace Lab Office National d'Etudes et de Recherches Aérospatiales Palaiseau France for encouraging him to carry on this research and for its financial support. Albena Tchamova is first of all grateful to Dr Jean Dezert for the opportunity to be involved during more than 20 years to follow and share his smart and beautiful visions and ideas in the development of the powerful Dezert Smarandache Theory for data fusion. She is also grateful to the Institute of Information and Communication Technologies Bulgarian Academy of Sciences for sponsoring her to attend international conferences on Information Fusion.
