Forward with Classics Arlene Holmes-Henderson, Steven Hunt, Mai Musié, 2018-08-09 Despite their removal from England's National Curriculum in 1988 and claims of elitism Latin and Greek are increasingly re-entering the mainstream educational arena. Since 2012 there have been more students in state maintained schools in England studying classical subjects than in independent schools and the number of schools offering Classics continues to rise in the state maintained sector. The teaching and learning of Latin and Greek is not however confined to the classroom: community based learning for adults and children is facilitated in newly established regional Classics hubs in evenings and at weekends in universities as part of outreach and even in parks and in prisons. This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century. The role of classical languages within the English educational policy landscape is examined as new possibilities exist for introducing Latin and Greek into school curricula. The state of Classics education internationally is also investigated with case studies presenting the status quo in policy and practice from Australasia, North America, the rest of Europe and worldwide. The priorities for the future of Classics education in these diverse locations are compared and contrasted by the editors who conjecture what strategies are conducive to success.

Students' Experiences of Teaching and Learning Reforms in Vietnamese Higher Education Tran Le Huu Nghia, Ly Thi Tran, 2020-10-29 Located within the global changing contexts of higher education in the 21st century this book examines the reform of the teaching and learning practices in Vietnamese universities under the Higher Education Reform Agenda and the influence of internationalization on the higher education sector. Specifically it analyses the motives, current implementation effectiveness and challenges of these reforms especially from student perspectives. Analyzing approximately 4300 survey responses and interviews with students the book covers a range of key issues related to teaching and learning in higher education which have attracted attention in recent years including: The learning environment, Student support and first year transition, Student centred teaching, The use of credit based curricula, The use of information and communication technology, At home internationalization of higher education, Assessment and feedback, Work placements, Informal learning via extra-curricular activities, Students' perception of the values of university education. *New Educational Technologies and Their Impact on Students' Well-being and Inclusion Process* Maria Luisa Lorusso, Daniela Traficante, Mirta Vernice, Barbara Carretti, Daniela Maria Sarti, 2022-01-13
