Abstract

A graphic CDI shows your position at the center of the indicator, relative to the desired course (the moving course deviation needle). As with a traditional analog CDI, when you're off course simply steer toward the needle. The CDI arrow in the center of the scale indicates whether you are heading to (arrow) the waypoint or if you have passed the waypoint (a down arrow).

The GNC 425 always requires PD a computer unless the OMS switch is set (preparing automatic alignment, appearing), or you have turned the last component in your flight plan.
