of Urban Services Charles K. Coe, 2015-01-28 City and county governments provide a wide array of highly technical urban services. Gaining a rudimentary understanding of them can be a daunting challenge for students as well as new and inexperienced public servants. Handbook of Urban Services is designed to help meet this challenge. In language that will make the fundamentals clear to non-specialists, this practical handbook provides concise overviews of 17 core local government services in four functional areas: public Safety and Health Services, Police, fire, emergency management, emergency medical, animal control, and public health; Public Works and Planning Services, Planning and inspections, water treatment and distribution, wastewater and stormwater management, street maintenance and construction, solid waste collection and disposal, and forestry; Leisure Services, Parks and recreation, and libraries; and Support Services, Public equipment, public buildings, and public facilities. Each chapter begins with a brief history of the service, followed by a discussion of effective management practices and policies. Chapter ending bibliographies refer the reader to sources with more in-depth treatment. **Mitchell's Introduction to Building** Roger Greeno, 2014-07-16 Introduction to Building

provides a comprehensive introduction to various aspects of development and associated building procedures from initial planning and design through procurement of building work, contractual arrangements, and construction techniques. Now in its Fifth Edition, this popular text continues to present an authoritative overview of the many design and practical considerations associated with the creation and maintenance of modern buildings, including repair of existing buildings and traditional construction procedures. Topics covered include the functional requirements of a building, appearance, durability, dimensional suitability, strength and stability, weather exclusion, sound control, thermal comfort, fire protection, lighting, and ventilating, sanitation, and drainage, security, cost, sustainability, building processes, the building team, communication, and construction methods.
