From Cells to Organisms Sherrie L Lyons, 2020-07-09 More than a history From Cells to Organisms delves into the nature of scientific practice showing that results are interpreted not only through the lens of a microscope but also through the lens of particular ideas and prior philosophical convictions Before the twentieth century heredity and development were considered complementary aspects of the fundamental problem of generation but later they became distinct disciplines with the rise of genetics Focusing on how cell theory shaped investigations of development this book explores evolution vitalism the role of the nucleus and the concept of biological individuality Building upon the work of Thomas Huxley an important early critic of cell theory and more recent research from

biologists such as Daniel Mazia From Cells to Organisms covers ongoing debates around cell theory and uses case studies to examine the nature of scientific practice the role of prestige and the dynamics of theory change The Mystery of Ireta Anne McCaffrey,2003-12-30 Few are better at mixing elements of high fantasy and hard science fiction The New York Times Book Review The crew of shipbred technicians sent to the planet Ireta were prepared for a routine mission to catalog flora and fauna and search for new energy sources Kai and his beautiful co leader Varian the best xenob vet in the business followed all the standard procedures but the result of their investigations was totally unexpected When their rescue ship mysteriously disappears they suddenly find themselves surrounded by giant swamp creatures deadly predators and terrifying dinosaurs And a curious change begins to come over many of the crew members a mutinous change that will lead all of them in one way or another into the primitive darkness of a future world that holds many mysteries yet to be revealed Down Syndrome and Other Chromosome Abnormalities Subrata Dey,2022-03-23 This book provides a concise yet comprehensive source of current information on Down syndrome and other chromosomal abnormalities Research workers scientists medical graduates and paediatricians will find it an excellent source for reference and review Key features of this book are as follows Mechanisms of aneuploidy Effect of sociodemographic factors on different congenital disorders Haematological malignancies and congenital heart disease in Down syndrome Prenatal screening management and counselling to detect Down syndrome and other chromosomal abnormalities While aimed primarily at research workers on Down syndrome and different types of chromosomal disorders we hope that the appeal of this book will extend beyond the narrow confines of academic interest and be of interest to a wider audience especially the parents and relatives of children suffering from Down syndrome and other chromosomal abnormality syndromes Scientific Evidence of the Christian Faith, DNA — the Starting Point Victor W. Chang, Guoping Song,2020-07-04 Does the Christian faith have scientific evidence This is difficult to believe However since DNA was discovered we now understand the entire DNA coding sequence of humans is consistent and the difference is only one thousandth The theory of mathematics probability tells us that it could not be the result of spontaneous generation Therefore the molecular biologist put forward that people of the whole world have the common grandfather Y chromosome Adam theory and the common grandmother Eve theory Do you agree What is amazing is that there is no difference between man s and woman s 2 9 billion chromosomal DNA coding sequence meaning that human DNA coding is from one individual Only men have the complete set of the chromosome so the source individual must be a man and the first woman was from the man The first man had no carnal parents and it only could be Adam created by God Due to the constancy of biological genome DNA coding it is impossible for any species to have an evolution connection not even microevolution This is what is recorded in the Bible as all living from each category It therefore can be seen that life s DNA coding sequence is from God s Creation From our DNA we could see that all the substances and lives in the universe are created by God These scientific facts are totally consistent with the Biblical record and are objective evidence of the Christian faith
