Von Neumann Architecture:

John von Neumann developed the concept of the **'stored program computer'**, which has been the basis of computer architecture ever since. Stored Program means:

Stored Program Concept

- The programs are stored permanently on a secondary storage device.
- Data and instructions are moved to/from memory / RAM to CPU directly.
- Instructions are fetched from memory/RAM one at a time.
- Data and instructions are moved to registers to be executed.
- Data and instructions are stored in the same memory / RAM.

An **instruction** and a **data** operation
cannot occur at the same time because they
share a common bus.
