Montessori Great Lessons:

The Montessori Great Lessons Guadalupe Reyes Vadillo, 2021-03-16 The Montessori Great Lessons are a series of stories through which children are presented with the basic structure of the topics they will develop during their academic training in Workshop equivalent to elementary school Workshop 1 includes grades 1 to 3 and Workshop 2 the grades 4 to 6 and allow a first approach to the holistic approach of the Montessori philosophy by showing us an interrelation of essential topics that shows us that every aspect of the knowledge of the world has contacts with everything else **International Handbook of**

Holistic Education John P. Miller, Kelli Nigh, Marni J. Binder, Bruce Novak, Sam Crowell, 2018-09-14 Providing a comprehensive overview of holistic education's history, conceptions, practices, and research, this Handbook presents an up-to-date global picture of the field. Organized in five sections, the Handbook lays out the field's theoretical and historical foundations, offers examples of holistic education in practice with regard to schools, programs, and pedagogies at all levels, presents research methods used in holistic education, outlines the growing effort among holistic educators to connect holistic teaching and learning with research practice, and examines present trends and future areas of interest in program development, inquiry, and research. This volume is a must-have resource for researchers and practitioners and serves as an essential foundational text for courses in the field. *Teaching Children* Ann El-Moslimany, 2018-01-01

The author explores education from the essential principles of Tawhid (Oneness of God), humanity, knowledge, fitrah (concept of human nature), and the role of humans as vicegerents of God on earth, responsibility, and stewardship. The current education system dates back a hundred years or more and is in desperate need of a reboot. In developing the industrialized society, the education system itself became like a factory, the end product being pupils who merely regurgitate facts and themselves end up as cogs in the machine that is the wider industrial complex. The legacy of this is a soulless functional educational system that fails to develop pupils to meet the present and future needs of individuals and their expectations. This failure inevitably impacts on society and humanity at large. Society has long since moved beyond the industrial revolution and into an age of global connectedness where the sum of human knowledge is freely available via the internet. It is an age where people are generally more well-informed and on a variety of issues. An effective holistic educational philosophy is required, one that gives full spiritual meaning to all that a child learns. It should equip children with spiritual awareness, morals, and values, social responsibility, and accountability, self-discipline, and self-determination, self-confidence, and empowerment, ambition, and aspiration, tempered with thoughtfulness and a sense of gratitude. *Maria Montessori's Erdkinder* Ela Eckert, 2022-10-01

Consistently based on the developmental needs in adolescence, Maria Montessori designed the concept of a Center for Study and Work in the Countryside for students aged 12-18 years, which gives young people the opportunity to learn about the basic structures of production, trade, and services in a manageable, transparent, and at the same time protected setting through Practice Theory-linked experiences. The book presents the basics of Maria Montessori's concept and gives, through reports,

with practitioners and interviews with Montessori experts insights into authentic implementations of the Farm school concept and thus into a learning arrangement that allows young people a high degree of responsibility and participation and strengthens their commitment to a sustainable approach to natural resources and a peaceful way of living The book also addresses schools without a Farm school practice and shows ways of approaching crucial components of this authentic and highly topical concept

Maria Montessori's Philosophy Patrick R. Frierson, 2025-02-27 Maria Montessori's Philosophy shows how Montessori's commitment to follow the child can be understood as a philosophical method for answering the great philosophical questions that confront human beings Patrick Frierson discusses historical influences on Montessori's philosophical views focusing on showing how her commitment to children led her to profound insights about a wide range of philosophical questions from foundational metaphysics to applied ethics and politics Her metaphysics grounded in the concept of life as she observes it developing in the child helps to address fundamental questions about the nature of the universe and the emergence of consciousness and value within it Her pragmatic empiricist epistemology provides the framework for a sophisticated account of various intellectual virtues conducive to excellent cognitive engagement with reality Her moral philosophy weaves together a broadly Nietzschean emphasis on self-perfection with respect for all human beings and a strong interest in social solidarity In her philosophy of religion she follows children as they guide her to recognize a sense for the divine and the importance of sensorily informed religious practice Her politics informed by lifelong feminism and concern for peace shows how the education of the child is the key to cosmopolitan solidarity and lasting peace Her philosophy of technology while recognizing the dangers of technological development also sees in children the human potential and even vocation to develop technology for the betterment of the world
