

Name: Lynne Jha

Date: 10/15/2020

Student Exploration: Seasons: Earth, Moon, and Sun

Background: Seasons, solar, celestial equator, horizon, latitude, revolution, rotation, celestial equator.

Prior Knowledge Questions: (Do these BEFORE using the Game.)

- Supposed you were stranded on the international airport as everyone is there. How would you know which way is north, or a particular season? I don't know. I would just wait till the sun is either up or down, I would either be looking at sunrise or the sun will be down there.
- How could you determine all your time? if it doesn't work.

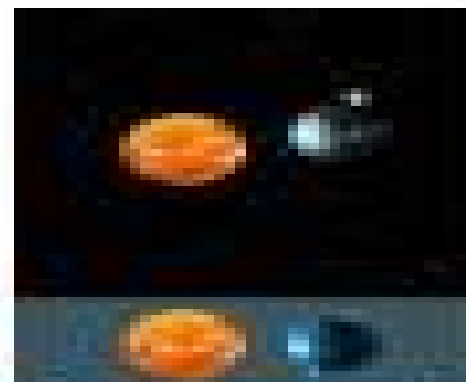

Game Play

Thousands of years ago, people were already looking at the sky. They figured out how seasons and constellations all fit in, and the knowledge passed on to future people through stories. How much is passed through stories, and how much is not?

In the Seasons: Earth, Moon, and Sun Game, you determine how you will relate the passage of time to different constellations.

Keep the Simulation open while all the steps below tell. Click Play (a) and observe the effects of the game.

- What happens? The Earth is rotating.
- What does the Earth look like from the ground? The sun rises in the sky, sets, and goes high.
- What does the Earth appear like? What do you see? The stars appearing in the horizon in the night.
- What does the Simulation tell you about the game? predicting that night and stars, seasonal, sunset, sunrise.

Moon Sun And Seasons Lab Answers
