Moonport - a History of Apollo Launch Facilities and Operations United States. National Aeronautics and Space Administration, 1978 Apollo and America's Moon Landing Program - Moonport: A History of Apollo Launch Facilities and Operations - Saturn 1, Saturn 1B, and Saturn V Rocket Launch Pads, Launch Complex 39 (NASA SP-4204)., 2011 *Moon Launch!* Charles D. Benson, William B. Faherty, 2020-10-15 The one thing for which this century will be remembered 500 years from now was This was the century when we began the exploration of space Arthur M Schlesinger Tributes to Moonport A History of Apollo Launch Facilities and Operations A thorough account of the complex scientific engineering and managerial efforts that undergirded the astounding events that the National Aeronautics and Space Administration carried out Journal of American History Another simply superb NASA official history Construction administration and technology are carefully interwoven in an unusually candid and frank treatment of the history of America's first lunar launching facility Aerospace Historian Moon Launch re-creates the exciting story of the astronauts and engineers scientists and technicians politicians and public citizens who expanded the world's understanding of humanity's potential the people responsible for the Project Apollo flights to the moon Through their teamwork at the Kennedy Space Center Cape Canaveral became the spaceport for the nation and in the mind of many the gateway to the universe A companion to Gateway to the Moon and also part of the 1978 NASA History Series Moonport volume this illustrated book describes the seven missions to the moon launched between 1969 and 1972 With the exception of the abortive Apollo 13 flight all landed successfully As the story progresses astronauts explore the moon's surface in the lunar rover complete with bucket seats and power steering set up experiments and bring back hundreds of pounds of lunar geological samples The book concludes with a description of the last and most spectacular liftoff Apollo 17 launched on a dark December night before a crowd of nearly 500 000 visitors Charles D Benson a retired colonel of the U S Army is the coauthor of the official history of the Skylab orbital workshop William B Faherty director of the Museum of the Western Jesuit Missions in Hazelwood Missouri retired professor of history at St Louis University and archivist emeritus of the Midwest Jesuit Archives is the author of 25 books including the historical novel The Call of Pope Octavian *A History of the Kennedy Space Center* Kenneth Lipartito, Orville R Butler, 2007-08-12 This first comprehensive history of the Kennedy Space Center NASA's famous launch facility located at Cape Canaveral Florida reveals the vital but largely unknown work that takes place before the rocket is lit Though the famous Vehicle Assembly Building and

launch pads dominate the flat Florida landscape at Cape Canaveral and attract 15 million people each year to its visitor complex few members of the public are privy to what goes on there beyond the final outcome of the flaring rocket as it lifts into space With unprecedented access to a wide variety of sources including the KSC archives other NASA centers the National Archives and individual and group interviews and collections Lipartito and Butler explore how the methods and technology for preparing testing and launching spacecraft have evolved over the last 45 years Their story includes the Mercury and Gemini missions the Apollo lunar program the Space Shuttle scientific missions and robotic spacecraft and the International Space Station as well as the tragic accidents of Challenger and Columbia Throughout the authors reveal the unique culture of the people who work at KSC and make Kennedy distinct from other parts of NASA As Lipartito and Butler show big NASA projects notably the Space Shuttle and the International Space Station had much to learn on the ground before they made it to space Long before a spacecraft started its ascent crucial work had been done work that combined the muscular and mundane with the high tech and applied the vital skills and knowledge of the men and women of KSC to the design of vehicles and missions The authors challenge notions that successful innovation was simply the result of good design alone and argue that with large technical systems real world experience actually made the difference between bold projects that failed and innovations that stayed within budget and produced consistent results The authors pay particular attention to operational knowledge developed by KSC the insights that came from using and operating complex technology This work makes it abundantly clear that the processes performed by ground operations are absolutely vital to success **An**
