Before reading

Worksheet: Vocabulary

Tell the children that they are going to read about electricity and give out the worksheet, which introduces some of the key vocabulary. The children should be able to guess all the correct answers. Ask the children to check their answers with a partner before you go over them with the whole class. Get the children to circle the correct pictures and to read out the correct definitions aloud.

Reading

Read pages 4 and 5 of the Factbook, pausing to discuss and explain the concepts, for example, by getting the children to point to the correct definitions and pictures on their worksheets as you come to those words. Alternatively, play the CD (track 33) instead of reading, pausing where necessary.

The children could then reread the sections to themselves or in small groups.

MC Ask some of the more confident children to read a short section aloud to the class.

After reading

Worksheets: How current electricity is made in a traditional power station and How electricity is made in a wind farm

Give out Worksheet 1: *How current electricity is made in a traditional power station*. The children look at the sentences at the bottom of the page and copy them onto the appropriate place on the diagram. Display your A3 copy of the diagram to go through the answers with the children.

Repeat with Worksheet 2: *How electricity is made in a wind farm*.

LC Go through the answers with the children first, using your A3 copies of the worksheets, before asking them to copy the sentences.

MC Write out some of the words before photocopying the worksheets for the children. Write the words on the board and ask the children to write the labels on the diagrams and fill in the gaps.

What you need

- A copy of the worksheet 'Vocabulary' for every child.
- A copy each of the two worksheets 'How current electricity is made in a traditional power station' and 'How electricity is made in a wind farm' for every child, plus A3 copies for yourself.
