and creators and distort the measurements of growth and GDP In the process innovation suffers and inequality rises The lesson here is urgent and sobering to rescue our economy from the next inevitable crisis and to foster long term economic growth we will need to rethink capitalism rethink the role of public policy and the importance of the public sector and redefine how we measure value in our society *Progressivism in America* David B. Mobility between Africa, Asia and Latin America Ute Rösenthaller, Alessandro Jedlowski, 2017-08-15 Trade connections and cultural exchange between Africa and the rest of the global South have existed for centuries Since the end of the Cold War these connections have expanded and diversified dramatically with emerging economies such as China India and Brazil becoming increasingly important both as sources of trade and as a destination for African migrants But while these trends have attracted growing scholarly attention there has so far been little appreciation of the sheer breadth and variety of this exchange or of its deeper social impact This collection brings together a wide array of scholarly perspectives to explore the movement of people commodities and ideas between Africa and the wider global South with rich empirical case studies ranging from Senegalese migrants in Argentina to Lebanese traders in Nigeria The contributors argue that this exchange represents a form of globalization from below which defies many of the prevailing Western assumptions about migration and development and which can only be understood if we consider the full range and complexity of migrant experiences Multidisciplinary in scope *Mobility between Africa Asia and Latin America* is essential reading for students and scholars across the social sciences interested in the interconnected economic and social make up of the global South

Secular Stagnation Theories Christina Anselmann,2020-04-17 In light of weak economic performances and rising income disparities across the developed world during the past decades this book provides a comprehensive overview of secular stagnation theories in the history of economic thought and examines the role of income distribution in various stagnation hypotheses By offering a historical perspective from the classical economists to the most recent stagnation debate of the early twenty first century the author shows that most stagnation theories were developed in periods of high and or rising income disparities Eventually it was Josef Steindl one of the least recognized stagnationists in the history of economic thought who put the distribution of income at the heart of his stagnation theory While Josef Steindl focused on the nexus between the functional distribution of income and economic growth this book includes the personal distribution of income in a Kaleckian Steindlian model of economic growth and stagnation In the model presented the nexus between economic growth and the distribution of income is a priori uncertain depending on the type of economic shock and the specific economic circumstances The author also discusses various empirically oriented policy implications aimed at fostering both economic growth and a more equal distribution of income This book appeals to scholars in economics and the history of economic thought interested in economic growth secular stagnation and income distribution

The Market Mind Hypothesis Patrick Schotanus,2023-10-04 What is economics missing link Recent economic crises have had a devastating impact on society Worryingly they gravely risked a collapse of the financial system These crises also painfully revealed economics blind spots Crucially economics is not an innocent bystander but central to the problem In this pioneering book Patrick Schotanus explains that economics mechanical worldview is the ontological error which leads to flawed thinking and faulty practices The Market Mind Hypothesis MMH thus calls it mechanical economics it not only erroneously views but also dangerously treats the economy as a machine the market as an automaton and its agents as robots Inspired by heterodox economic and leading cognitive thinkers this book offers an alternative paradigm Central to MMH s psychophysical worldview is the fact that consumers investors and other participants are conscious beings and that their minds extension makes consciousness a reality in markets exemplified by market mood Specifically denial of the complex mind matter exchanges as the essence of markets means the extended mind body problem is economics elephant in the room The book argues that if mechanical economics is the answer we have been asking the wrong questions Moreover we will not solve our economic predicaments by doubling down on the assumption of rationality nor by identifying yet another behavioural bias Instead scholars and students of economics and finance as well as finance practitioners need to investigate through cognitive economics the deep links between markets and minds to better understand both With a foreword by investment strategist Russell Napier an intermezzo by neuroscientist and complexity pioneer Scott Kelso and an afterword by 4E cognition philosopher Julian Kiverstein
