medication management is a fundamental aspect of the role of the mental health nurse. The author succeeds in her aim of providing both a basic knowledge of the subject area and an understanding of how the principles of psychopharmacology and medicines management are applied to clinical practice and the role of the nurse. The book has an excellent structure, each chapter beginning with clear learning objectives and ending with a summary of key learning points, multiple choice questions and a case study where relevant. The text is written in an accessible style, specific chapters for example chapter 5 Anatomy and physiology of the brain having clear diagrams that facilitate the reader's ability to understand both basic physiology and the principles of neurotransmission etc. The role of the therapeutic alliance is helpfully acknowledged when promoting adherence and concordance whilst the key medications prescribed for the specified disorders and the associated psychopharmacology are clearly described. I would consider the publication as being essential reading for any undergraduate mental health nurse, the text also being a valuable learning resource in the development of curriculum content. Mark James, Senior Lecturer in Community Mental Health Nursing, University of South Wales, UK. I'm delighted to recommend this new, welcome and accessible resource, an excellent book with much to offer student and registered mental health nurses and nurse educators in promoting safe and effective practice in medicines management. John Butler, Senior Lecturer in Mental Health, University of Central Lancashire, UK. This book comprehensively addresses all the major psychotropic drugs a mental health nurse will encounter when undertaking medicines interventions. Each mental health diagnosis is explored and the related prescribed medicines covered in depth. I would recommend this book for use as a core text book in undergraduate studies, registered nurses who want to increase their knowledge base and for non-medical prescribing students as a baseline source to learn about the psychopharmacology of drugs they will prescribe. Steve Hemingway, Senior Lecturer in Mental Health, The University of Huddersfield, UK.
