governments large and small can successfully launch carbon farming projects with the most appropriate crops and practices to their climate locale and socioeconomic needs Toensmeier's ultimate goal is to place carbon farming firmly in the center of the climate solutions platform alongside clean solar and wind energy With The Carbon Farming Solution Toensmeier wants to change the discussion impact policy decisions and steer mitigation funds to the research projects and people around the world who envision a future where agriculture becomes the protagonist in this fraught urgent and unprecedented drama of our time Citizens farmers and funders will be inspired to use the tools presented in this important book to transform degraded lands around the world into productive carbon storing landscapes Applied Fundamentals in Finance Enzo Mondello, 2023-06-23 This textbook provides a comprehensive introduction to portfolio management and investments Focusing on four core areas portfolio management equities bonds and derivatives it is primarily intended for undergraduate and graduate students alike However it will also benefit practitioners working in the fields of financial analysis and portfolio management and professionals who aspire to such professional activities in the financial industry To ensure its high practical relevance the book includes a host of case studies and examples from real world practice mainly from the German and Swiss financial markets Additionally the book shows how to implement the models in Microsoft Excel The Essential Manager James W.
