Traer,2018-05-04 Nothing is more difficult today than deciding what to do about abortion gay marriage economic injustice war torture global warming euthanasia capital punishment and a host of other controversies particularly in a world in which people of varying religious cultural and ethnic backgrounds commonly live side by side Can we draw on the wisdom of the past to address these contemporary ethical dilemmas Can we see more clearly how we should consider what is right and wrong and good and bad and then work through these divisive problems toward decisions that make sense to us While challenging moral relativism *Doing Ethics in a Diverse World* uses a pluralist approach that draws on religious as well as secular positions and on Eastern as well as Western traditions The book's approach reasons by analogy from the rule of law including international human rights law as a means to constructing ethical presumptions about duty character relationships and rights These presumptions are weighed against the predicted consequences of acting on them which either confirm the presumptions or support alternative actions **The Gospel of Peace in a Violent World** Shawn Graves,Marlena

capacity for moral behavior Kirkus Reviews A comprehensive introduction to religious skepticism Publishers Weekly In What It Means to Be Moral Why Religion Is Not Necessary for Living an Ethical Life Phil Zuckerman argues that morality does not come from God Rather it comes from us our brains our evolutionary past our ongoing cultural development our social experiences and our ability to reason reflect and be sensitive to the suffering of others By deconstructing religious arguments for God based morality and guiding readers through the premises and promises of secular morality Zuckerman argues that the major challenges facing the world today from global warming and growing inequality to religious support for unethical political policies to gun violence and terrorism are best approached from a nonreligious ethical framework In short we need to look to our fellow humans and within ourselves for moral progress and ethical action In this brilliant provocative and timely book Phil Zuckerman breaks down the myth that our morality comes from religion compellingly making the case that when it comes to the biggest challenges we face today a secular approach is the only truly moral one Ali A Rizvi author of *The Atheist Muslim* *Ecology, Ethics and Hope* Andrew T. Brei, 2015-11-30 *Ecology Ethics and Hope* explores what hope is how it operates and whether or not it is important in our response to ecological challenges like climate change deforestation biodiversity loss and pollution The book offers an accessible and timely overview of this emerging topic within environmental ethics a platform for further discussion and refinement of the notion of hope Hope has started to receive more theoretical attention from philosophers and social scientists In light of worsening ecological conditions the concept of hope may offer motivation for us to change our destructive ways and conserve the ecosystem goods and systems we depend on The authors in this collection take stock of the various accounts of what hope is or is not what it does or does not and how relevant it is to ecological thinking The book covers topics including the psychology of hope how it might operate and change minds hope as a motivator of positive action and hope's essence in the context of a virtue or obligation focused morality Contributors Elizabeth Andre Assistant Professor of Outdoor Education Northland College USA Jonathan Beever Postdoctoral Scholar Rock Ethics Institute Penn State University USA Andrew T Brei Visiting Assistant Professor of Philosophy St Mary's University Andrew Fiala Professor of Philosophy California State University Fresno USA Trevor Hedberg Graduate Student University of Tennessee Knoxville USA Lisa Kretz Assistant Professor of Philosophy University of Evansville USA Michael Nelson Professor of Environmental Ethics and Philosophy Oregon State University USA John Nolt Professor of Philosophy University of Tennessee Knoxville USA Brian Treanor Professor of Philosophy Loyola Marymount University USA **Secular Cosmopolitanism, Hospitality, and Religious Pluralism** Andrew Fiala, 2016-10-04 This book explores the idea of religious pluralism while defending the norms of secular cosmopolitanism which include liberty tolerance civility and hospitality The secular cosmopolitan ideal requires us to be more tolerant and more hospitable toward religious believers and non believers from diverse traditions in our religiously pluralistic world Some have argued that the world's religions can be united around a common core This book argues that it is both impossible and inadvisable either to reduce religion to one

thing or to deny religion. Instead, the book affirms non-reductive pluralism and seeks to understand how we should live in a pluralistic world. Building on work in the sociology of religion and philosophy of religion, the book examines the growth of religious diversity and the spread of nonreligion in the contemporary world. It argues that religious toleration, hospitality, and compassion must be extended in a global direction. Secular cosmopolitanism recognizes that each person has a right to his or her deepest beliefs and that the diversity of the world's religious and non-religious traditions cannot be reduced or eliminated.

Human Rights and the Environment in Africa Jean-Claude N. Ashukem, Semie M. Sama, 2023-11-24

The relationship between human rights and the environment, as evidenced by the 2022 UN Resolution on the human right to a healthy environment, is a topical, fascinating, uneasy, and increasingly urgent one. This timely collection explores the inextricable relationship between human rights and the environment as a critical lens for understanding and addressing key human rights and environmental issues confronting Africa. The work explores theoretical, philosophical, and doctrinal research to interrogate and provide clarity on how and whether the human rights-based approach to environmental protection and policy implications has been effective in enhancing environmental protection and sustainability in Africa. It brings together an elite group of African and international experts to investigate the increasing connectivity and problems with African human rights, environmental governance, and the quest for sustainability. The book is divided into thematic clusters including the right of vulnerable communities to sustainability, climate change, the right to development and natural resource governance, corporate environmental responsibility and sustainability, the philosophy of environmental ethics, and theories of human rights approaches to environmental governance, procedural environmental rights, the role of the judiciary in environmental protection, and desertification. These themes provide a structure to investigate and clarify specific fundamental questions on Africa's environmental governance paradigm. This innovative contribution provides an interdisciplinary approach to the philosophical interrelationship and use of human rights approaches to ensure and enhance environmental protection and sustainability. As such, the book will be of interest to African scholars, researchers, and students in human rights, law, environmental studies, political science, ecology, and conservation, and development studies. It will also be a valuable resource for policymakers, governments, NGOs, practitioners, and all those interested in African environmental governance.
