administration and policy studies and even geology The toponyms studied are gathered from all over Europe including Belarus the Czech Republic Finland Germany Greece Hungary Ireland Italy Norway Poland Portugal Slovakia Spain Sweden Ukraine the United Kingdom but also from countries on other continents such as China Egypt India Morocco New Zealand Russia or Tanzania The book is a must not only for onomasticians but also for researchers in related disciplines ranging from history via human geography or philosophy of language to social studies However professionals active in naming will find it useful as well since it provides a much needed supranational perspective and enables cross cultural comparisons
