The Counterair Companion James Michael Holmes, 1995 The early proponents of air power believed that with control of the air airmen would make surface operations impossible and irrelevant In the years since they made these predictions aircraft have gained capabilities far beyond those predicted by early advocates However airmen are still searching for a strategy that will guarantee the results their predecessors promised Instead of replacing surface forces air power has become their indispensable partner Air power contributes to the security mobility and firepower of joint forces but its primary contribution may be air superiority For the last 40 years United States military forces have maintained almost total control of the air Air supremacy does not itself destroy or defeat the bulk of enemy forces but it allows conditions in which joint military forces may do so by providing freedom of action and strategic flexibility
