

## Marking a Waypoint

A waypoint is any point on the Map Page that you want to remember. You can mark (create) a waypoint at your current location, enter the waypoint, and save it to use as a route (see "Creating Routes").

### To mark a waypoint

1. From the Map Page, press **MARK**. The Mark Waypoint page appears.
2. To name the waypoint, use the **ROCKER** key to highlight the "Name" field and press **ENTER**.
3. Enter a name for the waypoint on the keyboard using the **ROCKER** key and the **ENTER** key (see "Entering Data" on the previous page).
4. Highlight "OK" and press **ENTER** to save the waypoint.

## Finding Places

Using the Find Page, you can search for waypoints, points of interest, or cities. If you load optional MapSource® Points of Interest data on your GPS 60, you can search for businesses, lodging, restaurants, and more.

### To find a waypoint

1. Press the **FIND** key. The Find Page appears, highlighting "Waypoints" and press **ENTER**.
2. Use the **ROCKER** key to scroll down the list and highlight the waypoint you want to find. Press **ENTER** to select the waypoint. The Waypoint Information Page appears.
3. Use the **ROCKER** key to highlight "Map" and press **ENTER** if you want to view the waypoint on the map. Select "Go To" to begin navigation (see "Creating Routes").

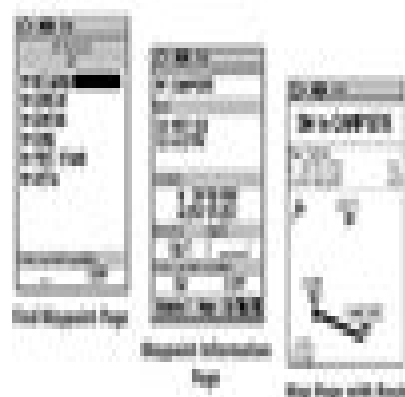

## Creating and Viewing Tracks

Tracks are like little fingerprints—they show you exactly where you have traveled. Tracks appear as a small dotted line on the Map Page. Your GPS 60 automatically creates tracks as you move and displays the dotted line, called a track log.

### To view tracks

1. Press the **MARK** key until you see the Map Page.
2. Walk away from your present location for at least three minutes.
3. Press **W** to begin to see the Map Page until you can see your track log.

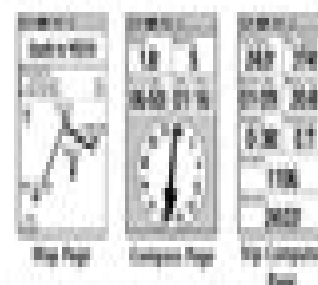

The Find Waypoint Page lists all of the waypoints you have marked. Press **ENTER** to select a waypoint. Then select "Map" to view the waypoint on the Map Page or select "Go To" to begin a route to the waypoint. The track appears on the Map Page as a dotted line from your current location to the waypoint.

## Creating Routes

A route gives you straight-line directions from one point to another, or from one point to several others. You can create a simple route by finding a waypoint and selecting "Go To" (see "Finding Places"). You can create more complex routes involving many points with the Route Page.

### To create a route

1. Press **MARK** until you see the Map Menu Page. Use the **ROCKER** key to highlight "Routes" and press **ENTER**. Then press **ENTER** again to create a new route.
2. Highlight "Select first Point" and press **ENTER** to add a point to your route. The Find Page appears.
3. Find a waypoint or other point to add to your route (see "Finding Places"). When you have found a point, select "Go To" from the Point Information Page to add the point to your route.
4. Repeat steps 2 and 3 to add more points to your route. When you are finished adding points, highlight "Waypoint" and press **ENTER** to begin using the route.

For the Map, Compare, and Map Compare Pages to recognize a route, the route information must first be on the Map Page. To copy waypoints from **ENTER** on the Map Page and select "Map Compare".
