Terrorism Innovation and Learning Magnus Ranstorp,Magnus Normark,2015-04-24 This book examines the role of terrorist innovation and learning in theory and practice and in the context of three specific EU case studies It is often said that terrorist groups are relatively conservative in character operating in a technological vacuum relying almost exclusively on bombs and bullets This observation masks increasing complexity and creativity and innovation within terrorist groups and one of the most distinguishing features of al Qaeda s terrorist operations is its propensity for remarkable innovation This book examines how and why terrorist groups innovate more generally and al Qaeda related terrorist plots in Europe more specifically The starting point for this book was twofold Firstly to examine the issue of innovation and learning more generically both in theory within specific themes and within the context of al Qaeda s influence on this process Secondly this book examines the evolution of specific al Qaeda related plots in three specific northern EU states the United Kingdom Denmark and Germany where there has been a significant volume of planned failed and executed terrorist plots In particular these case studies explore signs of innovation and learning This book will be of much interest to students of terrorism and counter terrorism political violence security studies and IR in general **Federal Register** ,2013-08 **De-escalating**

Koomen,Joop Van Der Pligt,2015-11-19 Terrorism and radicalization have a long history but in recent years their prominence has been a particularly conspicuous and influential feature of the global political landscape This important book presents an overview of the processes involved in radicalization and terrorism and introduces a systematic framework which captures the most crucial individual and social factors involved in determining these processes The authors begin by considering the possible role of prejudice economic deprivation and discrimination and the cognitive responses and emotions they can trigger

Such responses tend in turn to increase the importance of group membership and promote intergroup differentiation and polarization a process which is often accompanied by more pronounced and more extreme religious and ideological beliefs The book also describes the role of cultural values and social climate in processes of radicalization as well as the role of personality factors and demographics such as age and marital status As for violent terrorist action itself this final most radical stage is elicited by a number of group factors such as groupthink isolation and leadership Certain cognitive mechanisms for example dehumanizing the target and attributing responsibility elsewhere can also provide excuses for violence The book explores why some groups turn to violence and others don't and it addresses processes of disengagement deradicalization programs and other methods used to inhibit the spread of radicalization and terrorism The Psychology of Radicalization and Terrorism takes a unique and systematic approach to a vital topic integrating knowledge from diverse literatures and using social psychology as a basis for comprehending human behaviour It will be essential reading for students and researchers from all disciplines seeking a greater understanding of terrorism and violent political conflict in all its forms
