Grade 1 november 2014 Geography P1:

The Peter Fookes Engineering Geological Legacy in Geomodels, Geomaterials and Geomorphology J.S. Griffiths, D.P. Giles, J.A. Davis, J.J. Dunlop, 2025-11-04 This book is a celebration of the life work and legacy of Professor Peter G Fookes 1933-2020. As a professional engineering geologist he worked in over 100 countries, produced some 200 publications and was instrumental in setting up MSc programmes at Imperial College and Queen Mary College London. From the Geological Society he was awarded the William Smith Medal 1985 and was the first recipient of the Glossop Medal 1996. Although a mainstream geologist, his background in chemistry ensured he was at the forefront in concrete research and the use of geomaterials. Working with academic geomorphologists notably Denys Brunsden, David Jones, John Doornkamp and Sir Ron Cooke, he led the development of engineering geomorphology as a genuine adjunct subject to engineering geology. In addition, his Glossop Lecture set engineering geology along the path of developing geomodels for use in understanding the ground conditions pertaining to engineering construction.
