Handbook David H. Johnson,2007 This is the first publication to collect standardize and recommend a scientifically rigorous
set of field protocols for monitoring and assessing salmon and trout populations Includes five additional techniques that can
be used with any of the 13 principle methods to supplement information gathered Over four dozen fisheries experts
throughout the U S Pacific Northwest and beyond contributed their time to pick write and review the most reliable protocols
for enumerating salmonids in the field Presented in an easy to use format each of the 18 peer reviewed protocols covers
objectives sample design data handling personnel and operational requirements and field and office techniques including
survey forms Standardized monitoring protocols will improve data reliability maximize opportunities for data sharing and
data set comparability and ultimately improve the ability to assess status and trends The Handbook will also support
