

# Ling-6 Sounds Flash Cards

The Ling-6 Sounds represent various different speech sounds from low to high pitch (frequency). They help to test your child's hearing and check they have access to the full range of speech sounds necessary for learning language. Audiologists also use these cards to make adjustments to your child's listening program if necessary. The cards inside this pack showing the illustrated drawings are the Ling-6 Sounds Flash Cards.

They're easy to use – simply say the sound and observe if your child hears it. Very young children might look up when they hear the sound, while slightly older children can be taught to hold an object to their ear and put the object down when they hear the sound. Eventually your child can learn to imitate you. Just remember not to let them see you say the sounds – this way you can be sure they are actually hearing you, not lip reading. You might want to sit next to or directly behind your child during this activity.

You can start doing these activities straight away. In addition, try testing the sounds with your child from a series of different distances (1/2 metre, 1 metre, 2 metres and 3 metres).

Talk to your audiologist if:

- Your child is no longer able to detect a sound which they could previously detect.
- Your child starts to say the sounds differently when they typically say them correctly.
- Your child's ability to detect the sounds at varying distances worsens.

Keep encouraging your child to imitate the sounds – it does take time and practice.

**Ask your audiologist or speech therapist to show you how to use these Cochlear™ Listening, Speech and Language Cards. Further instructions and extension activities can be found on [www.cochlear.com](http://www.cochlear.com)**

*Hear now. And always.*
