

Structure:

1. Question 1 (all three):

- Identify the research method used and outline two characteristics of the method [3 marks].
- Describe the sampling method used in the study [3 marks].
- Suggest one alternative or one additional research method that could be used to investigate the aim of the original study, giving one reason for your choice [3 marks].

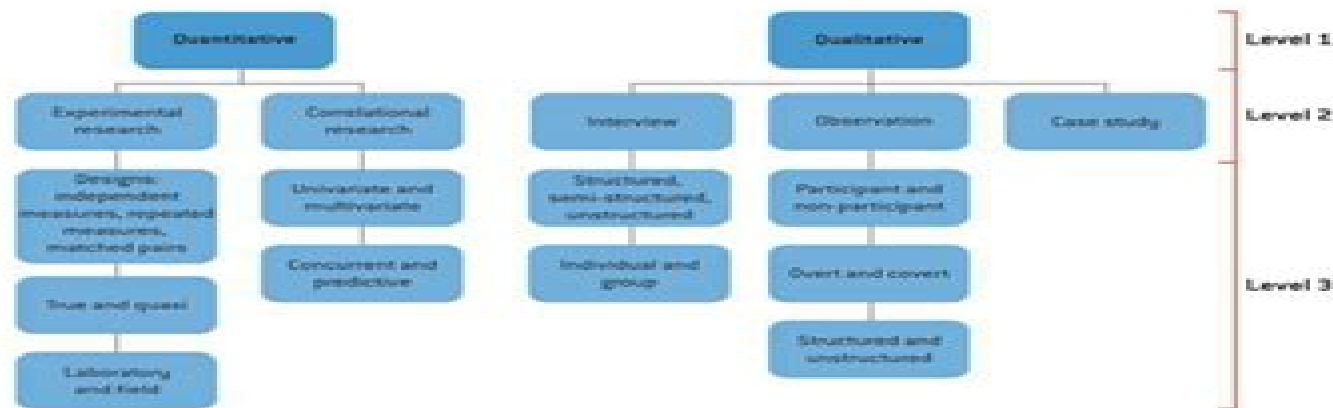

Figure 9.1.1 Hierarchy of research methods

Independent variable - variable which we expect to affect the outcome measure (DV)

Dependent variable - result of the effect of the IV

Correlational: IV - stress measured by a questionnaire, DV - maths test score

Experimental design: IV - cortisol injection (1 group - placebo, 2nd group - 10mg, 3rd group - 50mg), DV - maths test score

- Independent measures - random allocation of participants to each IV level
- Repeated measures - all participants take part in each condition

Independent measures - for each level of the IV, there is a different set of participants

Repeated measures - the same group of participants take part in all levels of the IV

Covert - when participants are unaware of the researcher observing them

Overt - when the participants are aware of the researcher observing them

Matched pairs - type of independent measures, but participants are pre-tested and then based on that allocated to a condition (no random allocation), for example they are given a maths test and then put into three groups based on the score
