

IB Psychology (SL)

Aims:

1. To develop an understanding of the biological, cognitive, and sociocultural factors affecting mental processes and behavior.
2. To apply and understand of the biological, cognitive, and sociocultural factors affecting mental processes and behavior to at least one applied area of study.
3. To understand diverse methods of inquiry.
4. To understand the importance of ethical practice in psychological research in general and observe ethical practice in their own inquiry.
5. To ensure that ethical practices are upheld in all psychological inquiry and discussion.
6. To develop an awareness of how psychological research can be applied to address real-world problems and promote positive change.

Things to Consider:

- ✓ Why are some studies so influential in spite of their methodology or theoretical flaws?
 - ✓ What was the historical context of the research?
 - ✓ Examine the evidence for and against.
 - ✓ Do not oversimplify. Look at the reductionist arguments.
 - ✓ Tolerate uncertainty- it is acceptable that research can be inconclusive or contradictory.
1. Employ cultural evaluation.
 - Make comparisons with studies done in other cultures.
 - Is there cultural bias in the theory/study?
 2. Employ gender evaluation.
 - Has gender been considered a variable in the theory/study?
 - Is there gender bias in the theory/study?
 3. Employ methodological evaluation.
 - What strengths and limitations are inherent in the methodology/method used?
 - Are there aspects of the method used that compromise the validity?
 - What would happen if the study were repeated today with different subjects?
 - Consider the use of triangulation to evaluate findings.
 4. Employ ethical evaluation.
 - Would the study be acceptable to a modern ethical committee?
 - Is there any justification for the infringement of ethical standards? (cost/benefit)
 5. Evaluate by comparison
 - How effective is the theory in explaining the behavior compared with another theory.

Ib Psychology Sl Paper 23:

Forensic Psychology and Neuropsychology for Criminal and Civil Cases Harold V. Hall, 2007-11-19 Greater Understanding Better Evaluations Today's increasingly sophisticated psychological and neuropsychological assessments allow for greater understanding and evaluations in forensic psychology. By integrating discussions of modern psychological and neuropsychological tests with extant civil and criminal cases, this book presents a unique resource for insight into the impact of modern behavioral science on the legal system. Foundational Criminal and Civil Issues Divided into three parts, this timely compilation of articles from national and international experts begins with foundational issues such as the legal, ethical, and applied aspects of mitigation evaluations. It examines violence prediction and risk analysis, violence in the family, and the detection of malingering and deception in forensic evaluations. Part 2 looks at the psychological issues found in criminal forensic evaluation. This section discusses assessments of competence to stand trial, mitigatory defenses, and hostage negotiation, as well as the psychological impact of officer-involved shootings. The final part focuses on neuropsychological evaluation as it is relevant to civil cases, including worker's compensation, malingered pain, and memory deficits, and parental assessment in child maltreatment cases. Template Case Studies Providing several full case studies in more than a dozen appendices, this book addresses both psychological and neuropsychological concepts in the context of the legal system and allows for a practical understanding and application of behavioral, legal, and ethical issues in civil and criminal cases. **The Environmental Psychology of Prisons and Jails** Richard Wener, 2012-06-18 Jails and prisons are the only settings in which people are held against their will, possibly for long periods of time, and often with no pretense of doing so for their personal benefit. Occupants have little, if any, control over their lives, as, for instance, the most basic assumptions about privacy to dress, shower, and use the toilet are violated. This book addresses the impact of environmental design on inmates and staff members in jails and prisons and shows how design can dramatically affect the level of stress and violence. **Communication Yearbook 4** Dan Nimmo, 1980-01-01 **Statutes and Ordinances of the University of Cambridge 2015** University of Cambridge, 2015-10-08 The official Statutes and Ordinances of the University of Cambridge. **Cyberpsychology** Monica T. Whitty, 2016-10-21 **CYBERPSYCHOLOGY** An important new textbook for an exciting area of contemporary psychological study and research. The field of cyberpsychology examines the psychology of interactions between individuals, societies, and digital technologies. This engaging and accessible textbook offers a complete introduction to the subject. The authors outline key theories, provide critical assessments, identify areas in need of further research, and discuss ways to use digital technologies as a research tool. They also include a wealth of real-life examples, activities, and discussion questions for students at undergraduate and graduate levels. Cyberpsychology provides up-to-date coverage of a wide range of topics relating to online behaviour and considers the potential impact of these interactions: offline, online identity, online dating, and relationships, pornography, cyberbullying, children's use of the Internet, online games, and gambling, deception, online crime.
